

Make Your Handheld GPS Work Inside Medium to Heavy Vehicle Class

GLI-COPPERHEAD

GLI-COPPERHEAD provides GPS coverage for the medium to heavy vehicle class. This means carry-on military and commercial GPS receivers will get satellite signals inside the following: GMV, MRAP, M113, M1126 Stryker, M2/M3A3 Bradley, Warrior, Namer, FRES SV and others. Soldiers have satellite connectivity and situational awareness prior to dismounting the vehicle. With GLI-COPPERHEAD, delays in acquiring GPS position are a thing of the past. A GPS receiver will experience no loss in signal coverage as it moves out of a ground vehicle when equipped with **GPS Live Inside**.

- Supports options not available in any other repeater
- Outperforms retransmission systems costing several thousand dollars more.

GPS Retransmission technology developed by GPS Source, Inc. is currently utilized by Land Warrior units aboard Stryker, RG-33 and M1151 vehicles.

Dismounted Warfighter Missions Can Immediately Deploy with No Delay in GPS Reception.

Provides GPS Signal for These Apps and More. . .

- Toughbook Computer
- DAGR
- FalconView
- Tacticomp™
- Parachutists NavAid
