

Support Cost Effective Timing for DAS Use GPS Splitters from GPS Source

Split the Connection & Keep the Timing

Take full advantage of the cost savings a GPS splitter can provide to amplify and divide timing signals between multiple BTS units inside a BTS Hotel.

GPS Splitter

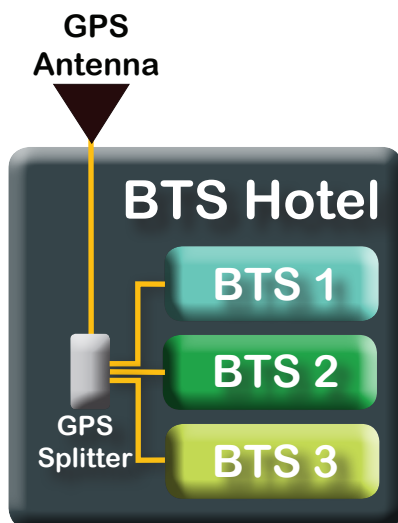

One GPS antenna can service multiple BTS units with a GPS splitter or rack mount. Strict timing & synchronization requirements make GPS Source splitters the best choice inside a BTS Hotel.

Options

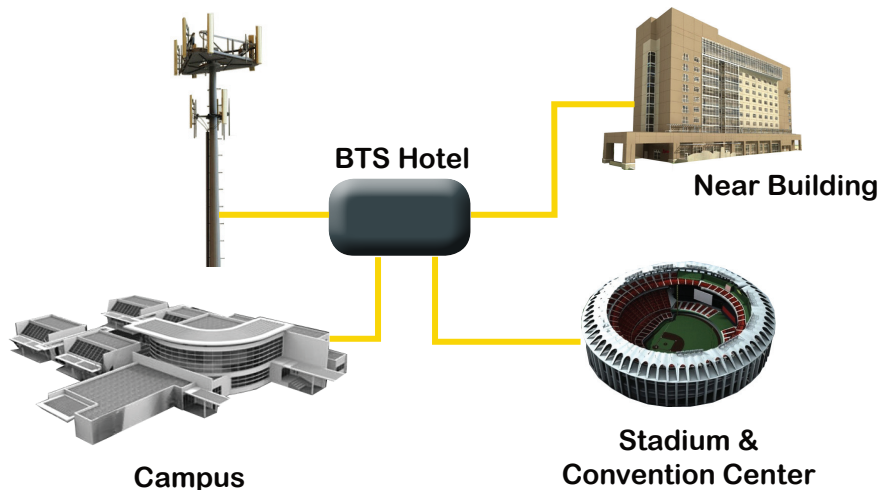

- Custom Gain on Any Port
- Any Port Passing DC
- EMI Shielding
- Surge Protection
- Custom Connectors
- Antenna Monitoring
- Many DC power choices
