

# Scala Table

Designed by Simon Legald for Normann Copenhagen

## A striking collection of tables that master the art of disguise

Based on the principles of streamlining and flexibility, Normann Copenhagen has designed a versatile collection of tables, which fit in anywhere due to their great adaptability, from the smallest breakfast nook to the grandest of dining settings. Along with the familiar Form Café Table, Allez, Scala and Lunar's striking designs easily stand out, yet at the same time subtly blend into the existing surroundings.

The collection is based on an ingenious concept around a simple design featuring steel or aluminum frames that can be combined with a wide selection of circular or square tabletops. The elegantly floating tabletops, ranging from 60 to 150 cm in diameter, and the variable-height frames allow the versatile tables to adeptly serve as sideboards, coffee tables or meeting places in restaurants, office spaces as well as dining areas in the home. The collection's main materials such as steel, wood, and natural stone patinate gracefully over time and radiates quality and durability for use in both indoor and outdoor settings. With a simple table frame as a base, the many tabletop options allow for creating bold combinations based on either matching or contrasting structures and finishes.

The variants span from the luxurious and sensual warmth of traditional oak to the stark reflections of raw steel plating, creating a cooler expression with a touch of modern industrial elegance. A refined selection of Italian marble slabs in muted tones of black, white, coffee and sand lend a sense of exclusivity to any decor. Marble is a natural material interspersed with a rich variety of veins and swirls that highlight the inherent beauty of the stone and whose subtle nuances is a beautiful sight to behold. Whereas the oak veneer tabletops are designed for indoor use, the tables with stainless steel and marble tops can also be enjoyed year-round in outdoor settings.

With the launch of this table concept, Normann Copenhagen once again demonstrates the breadth of its furniture collection, satisfying multifarious needs in private homes as well as public spaces. This emphasizes the design company's ambition of creating sustainably produced and long-lasting designs that stay relevant for generations to come.

### Scala table

The column is an architectural feature that for years has served as a source of inspiration for artists and designers. As a tribute to the column's architectural significance, designer Simon Legald has chosen to emphasize the column's form in his otherwise straightforward Scala design. This has the added benefit of providing the table with a high degree of stability. Scala's characteristic frame is composed of four columns that change in expression depending on the vantage point. The sturdy base is fashioned from solid steel while the round tabletop is available in either oak veneer, marble or stainless steel. Scala comes in coffee, café and dining table sizes, and the material's structure is particularly enhanced, when the table is scaled up to 130 and 150 cm diameter sizes. With its inclusive circular shape, Scala gives equal status to everyone, whether the table is the focal point of the home dinner party, restaurant outing or conference meeting.
