

CAMERA 360 BLUETOOTH WIRELESS SHUTTER RELEASE USER MANUAL

DEVICE COMPATIBILITY

The CAMERA 360 Bluetooth Remote Shutter is compatible with Android and iOS Devices manufactured from 2010 onwards that operate Bluetooth 3.0 or higher.

Most ANDROID devices with OS version 4.2 or higher will function with this remote. For Sony Xperia Z, HTC New One and X+, and some other ANDROID devices you will need to download the "Camera360" App from Google Play.

The CAMERA 360 shutter release will perform about 2000 shutter release actions from a fresh battery. Please note, changes to your Android or IOS operating system may affect compatibility with this remote shutter release.

USAGE

1. If your battery is not installed, first slide the battery cover off and insert the supplied CR2032 battery with the plus (+) side facing up. Now while pushing down on the battery cover, slide it over the battery until fully closed.

2. Turn ON your CAMERA 360 Remote Shutter by moving the ON/OFF switch to ON. Wait 6 seconds until the LED Indicator Light flashes slow and bright blue. The CAMERA 360 shutter release is now in pairing mode.

3. Activate the Bluetooth device search function on your SMARTPHONE.

4. In the Bluetooth settings select the device, "AB Shutter3". This will automatically pair your CAMERA 360 Bluetooth Remote shutter to your SMARTPHONE. The flashing on the shutter release will end indicating the device is paired with your phone. With some Android devices you must enable "remote input" after pairing. The CAMERA 360 Bluetooth Remote Shutter emulates a bluetooth keyboard in your phone.

5. Enter your CAMERA mode on your smartphone and then press on one of the two buttons on the CAMERA 360 Bluetooth remote to trigger a shutter release and take a photo. With some phones the first press enables the remote shutter function indicated with a box around the shutter button, and then the next press will take a photo.

For all iOS Apple phones press the large iOS button to take a photo. For most ANDROID phones the large button will release the shutter or if the large button does not function try the small button. If neither of the buttons function on Your ANDROID device, you can download the "Camera360" Application from GOOGLE PLAY App Store.

6. When your CAMERA 360 shutter release is not in use, turn the power switch OFF.

7. The battery will need replacing when you turn on the CAMERA 360 shutter release power switch and you do not see the blue indicator flashing,
