

# Pole Repair Kit Order Guide

Fill Out this form and it will show you the correct Pole Repair Kit for your rusted pole. In each section, circle the option that will fix your damaged pole.

1. What size is your pole, the pole repair fits round and square, non-tapered poles.

- a. Circle **4** if your pole is a 4-inch round or square pole.
- b. Circle **5** if your pole is a 5-inch round or square pole.

<p>4" PRK base fits a base plate bolt circle of 8 3/4"-12 1/2"  5" PRK base fits a base plate bolt circle of 10 3/8"-13 3/4"</p>
--

2. Now measure the height of the pole.

- a. If the pole is up to 20-feet circle **A**.
- b. If the pole is up to 25-feet circle **B**.
- c. If the pole is up to 35-feet circle **C**.

3. Next take note of the anchor bolt size.

- a. If the anchor bolts are up to 3/4-inch circle **1**.
- b. If the anchor bolts are up to 1-inch circle **3**.

4. Make sure to check the integrity and usability of the anchor bolts.

- a. If the anchor bolts are useable under the nuts, circle **S** for the standard base.
- b. If the anchor bolts have failed and are no longer useable, circle **E** for the expanded base.

5. Finally, take note of the exact anchor bolt size and write it in here.

- a. Ex: 1/2, 5/8, 3/4, 7/8, 1, or 1 1/4

6. Now transfer your selection from each section to its corresponding section below and that is the Pole Repair Kit part number that will fit your pole.
