

# CarBuddy™ Installation Instructions

As a rule of thumb, anything in your car that is not installed by the manufacturer can become a projectile risk during an accident. Please use all products including ours in a safe manner.

If you have any issues or need any assistance, please call us at 1.866.291.8635 or email us at [support@lil-gadgets.com](mailto:support@lil-gadgets.com). Thank you!

**100% Satisfaction Guarantee & 1 Year Warranty**

**Step 1.** Adjust the 2 front seat backs to the same position and the headrest posts to the same level to ensure best fit.

**Step 2.** Loosen the lock lever at the two ends of the pole. Once the hooks are tightly secured, tighten the lock lever to secure the pole.

**Step 3.** Loosen the lever on the tablet mount bracket, and adjust to desired location. When you find the best location, tighten to secure.

**Step 4.** Attach the adjustable mount to the bracket. PUSH DOWN firmly to lock until "CLICK" is heard.

**Step 5.** Spread the adjustable arms and insert the tablet, making sure the arms hold the tablet from the corners, not the sides. You can adjust the angle of the mount for best viewing angle.

**Step 6.** Make sure to regularly check the tightness of the clamps that are attached to the headrests as well as the knob on the back of the mount so your device stays securely in place. The knobs can loosen with regular use in a normal driving environment.
