

**AN AMERICAN MANUFACTURER SINCE 1948**

SECURITY • MAINTENANCE • INDUSTRIAL • ACCESS CONTROL • IDENTIFICATION • LAW ENFORCEMENT • TACTICAL

**STEP-BY-STEP INSTRUCTIONS**

**STEP 1** - Select the pair of posts that best accommodates the number of keys you're going to carry.

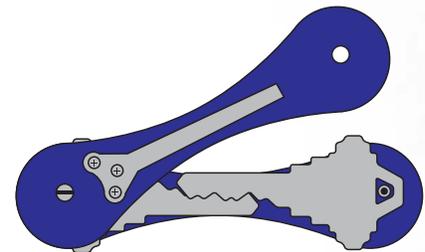

**STEP 2** - Remove the screw from the post and insert the post into the front cover of the KEY-HUB and lay down on a flat surface with the logo facing down.

**STEP 3** - Place a spacer on each post, then a key and repeat based on the number of key's you're adding. Ending with the last key or spacer flush with the top of the post.

**STEP 4** - Add the backside belt clip plate to the post and secure with the post screws using a screwdriver or coin

**STEP 5** - Your KEY-HUB is set and ready to go. Add your car key fob to the included split ring for added convenience
