

# TICKER - Breaking Dosing Limitations

## The Power of Micro Dosing Topical Preparations

### ...ON FINE TUNING

Doubling or tripling dosages of hormones could have serious adverse effects. Most of these occurrences are often posed by limitations due to the chosen delivery system. With the arrival of the TICKER and its impressive *micro dosing* ability, physicians around the globe have less to worry as a patient's dosage can now be incrementally decreased or increased at home. Comparing to other delivery devices such as pumps, syringes, or pens; which encompass serious dosing limitations, Ticker is likely the best choice. With Ticker, the patient simply fine-tunes his/her dosage to optimal health as instructed.

Patient adherence at its best!
