## Ear cuffs

Why must earrings dangle? Why can't they slither and entice? Why can't they suck on your earlobe and nibble the cartilage? Why can't they nestle into the shell like a curious, glittering tongue? Well, of course they can, and will, and do. More and more, the ear cuff and the snakingly intrepid earring are featuring on high-end ears. Risqué and edgy, they may shock – but they will also titillate. And you don't need big tits or great legs for this kind of sexy. It's the attitude kind of sexy. The best kind. **AR**
