

Robust and powerful petrol driven cold water high pressure cleaners

The MC PE range is ideal for use in areas where electrical power is not available, or is not strong enough to allow high pressure cleaning. Self priming and suction ability also mean that water can be drawn from a tank, well, lake or any natural water source - ideal for use in building and construction, rental and agriculture.

Ideal for regular use in hard to reach places, use this machine for high pressure cleaning where there is no power available. Highly manoeuvrable, lightweight cold water pressure cleaner with pneumatic wheels to go anywhere. This machine is popular with tradesmen, transport companies and agriculture. Reliable Honda motors (PE) ensure long working life.

The self priming and suction ability means water can be drawn from a tank or river, ideal for use in any rural setting.

Gerni. The only Gerni

Picture shown may not represent model quoted

- Robust long life pumps with ceramic pistons.
- Robust design
- Honda motor
- Wide range of performance levels with high pressure levels
- Lightweight, yet maniable design
- Ergo accessory concept
- One year commercial warranty
