# N51/1 KPS

## 50L POWERFUL WET VACUUM CLEANER WITH PUMP

**Great for pumping out water after floods or water main breaks, washing flat roofs, pond or pool sanitation, and other cleaning duties**

The N51/1 KPS, with its 50 litre container volume, is ideal for tough, professional use. The integrated pump with a flow volume of up to 14,000 litres per hour can be directly attached to the vacuum's power socket. A filter net prevents leaves, wood, and smaller objects from entering the container and prevents blockages.

The filter net can be emptied via the robust zipper. Wastewater is continually drained from the container through the provided 10m wastewater hose. The C-tube connection of the wastewater hose is a standard size that also fits fire department and technical emergency service (THW) hoses.

The N 51/1 KPS can also be used as a normal vacuum cleaner and achieves a suction power of 230 mbar.

*Water is pumped in through the vacuum hose. The integrated water pump then draws the collected wastewater immediately through the C-tube connection and out through the backside of the device.*

# N51/1 KPS

- 50L tank capacity
- Robust container made of impact-proof plastic
- High-performance pump with a flow volume of up to 14,000 Litres per hour
- Total power - 2200 Watts
- Device - 1300W / Pump - 900W
- Weight - 15kg
- Trolley handle for easy transportation
- Wet floor nozzle (360mm wide)
- 4 x 50cm plastic suction tubes (38mm)
- 7m suction hose length
- 10m wastewater hose length with C-tube connection
- Crevice nozzle, pond nozzle & dusting brush
- Volume flow rate - 70L/sec
- Max. suction - 230 mbar
- 38mm tools/accessories
- 7.5m power cord length
- Power cord incl. GFCI interrupter
- Separate filter net with zipper for rough particles
- Also suitable for normal vacuum use

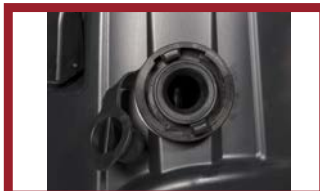

Model: **V-N51**

## FEATURES:

The powerful pump inside the vacuum cleaner has a capacity of up to 14,000 litres of waste water output per hour

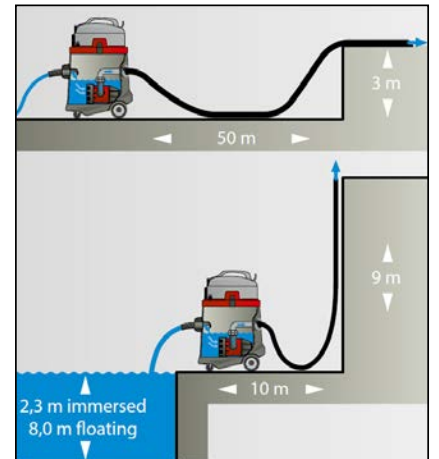

C-tube connection for 10m wastewater hose, suitable for fire service hose

# V-N51-110048

The filter net protects the pump from leaves and other coarse particles

360mm wide wet floor nozzle

Transparent pond nozzle is well-suited for pool cleaning and for removing water after floods
