

Bedrocan Canada Hosts Masterclass for Medical Professionals

April 5th, 2016

Toronto, ON- As part of its ongoing commitment to education, Bedrocan Canada Inc. (Bedrocan Canada) will host its inaugural Masterclass course for medical professionals on Saturday, May 14th, 2016. The renowned Masterclass program was developed in the Netherlands by Bedrocan BV and continues to attract participants from around the world each year. This is the first time that the in-depth seminar is being offered to Canadian physicians.

Our one-day Masterclass will explore medical cannabis from a practitioner's perspective, offering participants a number of detailed lectures, practical demonstrations, and a tour of Bedrocan Canada's facility. The Masterclass will offer a unique perspective into all facets of cannabinoid medicine, from chemistry and quality assurance, to patient care and safe consumption.

"It's important that healthcare practitioners have the opportunity to learn about cannabis from a medical and patient perspective, so they can make informed decisions," said Amanda Daley, Head of Medical Education and Outreach at Bedrocan Canada. "As more patients become interested in cannabis as a treatment for a variety of symptoms, doctors will need to be able to answer cannabis-related questions when their patients bring them up. The Masterclass is a unique opportunity for practitioners to learn from leaders in the field."

Twenty-five healthcare practitioners will participate. One major aim of the Masterclass is to bring together individuals from diverse fields and specialties. Interested candidates are invited to submit a brief motivation letter to masterclass@bedrocan.ca by April 22nd.

Bedrocan Canada is dedicated to its strong roots in the medical sector, and the Masterclass is the next step in a series of Bedrocan Canada initiatives that focus on advancing the field of cannabinoid medicine.

Presenters:

Dr. Arno Hazekamp, Head of Research and Education at Bedrocan BV, will offer his expertise in all facets of a science-based approach to medical cannabis. His first seminar will discuss the chemical properties of cannabis, providing a basis for understanding cannabinoids and terpenes as well as the body's own endocannabinoids. Dr. Hazekamp will also conduct a seminar on administration forms, quality control, and product development. Dr. Hazekamp was actively involved in creating quality standards used by the Dutch Government, and was a co-founder of the non-governmental organization (NGO) NCSM, intended to inform physicians and patients of the proper use of cannabis in clinical practice.

He is the author of numerous scientific papers on cannabis chemistry, delivery mechanisms, quality control and patient surveys. As an international authority on biochemical cannabis research, he is considered one of the foremost researchers in the field.

Dr. Danial Schecter, the co-founder of the Cannabinoid Medical Clinic (CMClinic), a practicing family physician and leader in the field of cannabinoid medicine, will discuss his approach to prescribing, the patient perspective, and safe cannabis consumption in his clinical seminar. After working alongside some of Canada's leading researchers in the field of medical cannabis, Dr. Schecter developed a strong interest in the therapeutic use of cannabinoids. As a recognized medical expert in the field of

prescription cannabinoids and medical cannabis, Dr. Schechter has given numerous presentations to fellow physicians and developed educational programs on this subject.

Tjalling Erkelens, the CEO and Founder of Bedrocan BV, will discuss the finer points of standardization, growing, and cannabis varieties. For the past 20 years, Mr. Erkelens has developed and standardized methods of producing cannabis to medical grade. Under his leadership, Bedrocan BV has become the only company in the world whose cannabis is exported for patient use in full compliance with international law. Bedrocan BV currently supplies cannabis to patients in Czech Republic, Germany, Italy, Finland, Poland and Norway, and to researchers around the world.

About Bedrocan Canada

Bedrocan Canada is focused on medical cannabis production and research, including the EQUAL Study, which is currently enrolling patients and evaluating how cannabis is affecting the quality of life of Canadian patients. Bedrocan's standardized strains have been used by tens of thousands of patients in seven countries around the world. www.bedrocan.ca

About Bedrocan BV

Bedrocan® BV has its roots in the agricultural sector of the northern Netherlands and is the only producer of medicinal cannabis for the Dutch Ministry of Health. The cannabis is produced to the highest quality standards, in compliance with national and international regulatory requirements. It has been sold in pharmacies on prescription since 2003, covered by health insurance in the Netherlands since 2011, and is the only cannabis in the world exported for medical use.

About Canopy Growth Corporation

Canopy Growth is Canada's first publicly traded medical cannabis company and the first geographically diversified producer with multiple licenses under the Marihuana for Medical Purposes Regulations. Through its wholly owned subsidiaries, Tweed, Tweed Farms, and Bedrocan Canada, the Company operates three state-of-the-art production facilities in Ontario and distributes cannabis across the country to Canadian patients managing a host of medical conditions. The Company is dedicated to educating healthcare practitioners, providing consistent access to high quality medication, conducting robust clinical research, and furthering the public's understanding of how cannabis is used for medical purposes. www.canopygrowth.com.

Forward Looking Statement

This news release contains forward-looking statements. Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "estimates", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company or any of its subsidiaries to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements.

Although Canopy Growth Corporation has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or

intended. Readers should not place undue reliance on forward-looking statements. The factors identified above are not intended to represent a complete list of the factors that could affect the Company or any of its subsidiaries. The forward-looking statements included in this news release are made as of the date of this news release and Canopy Growth Corporation does not undertake an obligation to publicly update such forward-looking statements to reflect new information, subsequent events or otherwise unless required by applicable securities legislation.
