

Instructions on How To Open The Fabric Vietnamese Lanterns

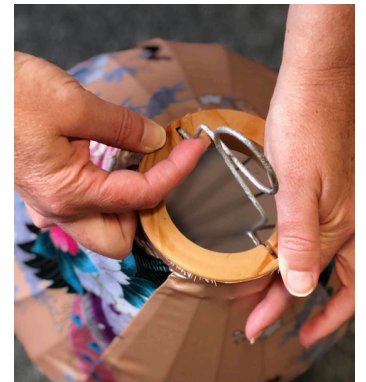

Make sure that when you open your Fabric Vietnamese Lantern, you place the bottom pointy section with the tassel on something soft such as carpet or cardboard.

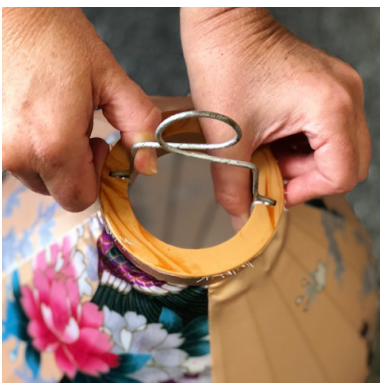

Push down on the Lantern whilst guiding the metal spine through the Top hole. Make sure the indents in the wire fit snug into the grooves provided.

Put one side into the groove first before moving onto the next side.

Check that both sides of the support wire have fitted snugly into the grooves provided.

Once in place, it should look like the image on the right.
