Designed For You.

4 Fold Flap
Card Tutorial

Print and cut out each sheet. Print a backing paper onto the reverse of sheets 1, 2 and 3.

Score along the lines on each of the flaps and fold.

Glue the panels to the reverse of the tabs. Take care to put them on the right way round.

Apply tape or glue to the tabs on the flaps and glue to each side of one of the card bases.

Again, take care to place each piece in the right place. Glue the second card base over the first to hide all the tabs.

Glue the centre panel in place and add any decoupage or embellishments.

Make up the envelope by folding the tabs in and gluing in place.
