Do you know someone with **Arthritis, Joint** or Neuropathic Pain?

Made with Natural Ingredients

About Mountain <u>Ice</u>

Mountain Ice is the newest product to hit the **pain relief market**. It has taken the active ingredient of menthol and combined **powerful natural plants and extracts** to create a specially designed formula that reaches pain at the source.

The combination creates the perfect blend of rich ingredients formulated to relieve pain, reduce inflammation, improve circulation, and promote better muscle and joint healing.

Mountain Ice works by cooling the top layer of skin which numbs and blocks pain signals to the brain. This provides temporary relief of minor aches and pains of muscles and joints associated with osteoarthritis, rheumatoid arthritis, neuropathy, muscle strains and sprains.
