MOUNTAIN ICE ECZEMA CREAM

Mountain ice Eczema Cream is an advanced formula that hydrates, restores and rebalances the epidermis lipid layer of the Skin. The epidermal lipids play an essential role in the skin's barrier function.

Our formula contains a unique lipid concentrate that improves the skins moisturation while repairing the damage caused by harmful irritants on the skins protective barrier. The skins barrier is vital for healthy skin.

Made with SOLINE[®] BIO and SK-INFLUX[®] V MB

- **SK-INFLUX® V MB** Made with a Patented Skinidentical lipid concentrate that restores the protective barrier function of the skin. Contains 6% LIPID Concentrate (1.5% Ceramide complex (Ceramides I, III, IIIB, VI), 0.5% Cholesterol, 3.5% Free fatty acid and 0.5% Phytosphingosine)
- SOLINE® BIO A clinical study on the moisturizing effects of Soline showed that after a single application there was an immediate increase in moisturization: 48.6% moisturization 1 hour after application with lasting effects shown by the +34.2% moisturization after 24 hours. After 4 weeks of 2x per day application, a 52% improvement in surface appearance of the skin was observed. Dryness, roughness and desquamation showed significant improvement. This active ingredient is thus used for the relipidation and restructuring of dry, atopic and mature skin.
