

To determine the size of an existing ring simply print this sheet out at 100% sizing on your printer. Ensure that all re-sizing options such as 'shrink page to fit' or 'scale to page' are disabled.

To double check that you have printed the sheet at the correct size measure the bar at the bottom of the chart and it should be exactly 5cm from end to end. If it isn't re-check your printer settings and try again. Using this guide without printing it out at the correct size will result in inaccurate sizing of your ring.

Once you have printed the chart our correctly place your ring over the circles until the inside fits exactly over the coloured portion with no overlapping. This should be the size of your ring.

Please refer to the ring sizing page on our website for more detailed guidance. This sheet is intended for guidance purposes only. If in any doubt, have your ring or finger measured by a reputable jeweller.

measure internal dimension ONLY
