

Setting up Wipeout for Shopify

Wipeout
By StoreBuilder

Install the app from the App Store.

Step 1. Setting up the App – The app requires upgrading to the \$3 per month account.

- Add your email address for reports to be sent
- Check both Automatically options – save settings.

Email for Results Results will be emailed to this email address	Contact Email: <input type="text" value="test@globalcrafts.com"/>
Automatic Option Settings	<input checked="" type="checkbox"/> Automatically HIDE Sold-Out products (Daily) <input checked="" type="checkbox"/> Automatically UN-HIDE Back-in-Stock products (Daily)
Manual Option Settings Completely FREE!	Choose what to do: <input checked="" type="radio"/> HIDE each sold-out product <input type="radio"/> UN-HIDE in-stock products

Advanced Use

If you wish to exclude some products from the Hide Unhide functions of Wipeout you can add them either via a file upload or individually.

This means that these products will show onsite as Out of Stock when the quantity is zero.

Exclude Individual Products from Hide/Un-Hide

After hitting the "Search" button, Please wait for ~3 seconds for Shopify to return results
