

Flowstar (UK) Limited was founded in 1988, as a quick response stockist and distributor for Broady Flow Control. Today Flowstar is independently owned, and even though Broady products are still a very big part of our business, our portfolio now also includes products from other high quality leading manufacturers.

TEN GOOD REASONS TO BUY FROM US

1. Flowstar is a very reliable, stable and solid company and hence makes the perfect business partner.
2. We have the expertise in house to size and specify the right valve for the application.
3. We deal with all of the major manufacturers.
4. Each of our technical sales staff are specialists in their field with at least 20 year's experience.
5. We carry large stocks meaning we can deliver quickly.
6. We have in house repair and test facilities.
7. We can deliver directly to you or directly to your customer using plain labels and your own paperwork.
8. We listen to the needs of our customers and react to give you the service you require.
9. We pride ourselves on giving a good service at the right price.
10. You can rely on us not to let you down.

So whether you are an end user, manufacturer, other stockist, distributor, or contractor, then please get in touch.

Safety Valves and Relief Valves

Flowstar has extensive knowledge in advising our clients on the correct valve for their individual requirements. We are the exclusive stockists and distributors for many leading manufacturers, hence we also have the approval to set, test and repair their products. Because of this and the fact we hold large stocks means we can despatch the same day directly to your specified address.

Butterfly, Ball, Gate, Globe, Diaphragm and Check Valves

Flowstar keeps good stocks of butterfly, ball, gate, globe and check valves. We keep branded and non-branded versions in each range so that we can meet your requirements and budget quickly. We are approved agents of several leading brands but we can also source quickly any other valve type and manufacturer. We can also supply each of these valve types with and without actuators and position indicators.
