Flowstar News....

Flowstar have now moved to their new premises. Our new address is:

Flowstar
Wiltshire Road,
Kingston-upon-Hull,
HU4 6PA

To avoid any confusion, can you please ensure this is updated on your system. Thank you.

Flowstar are proud to announce that we are now ISO 9001:2015 approved.

New Stock Products....

The **NABIC 520 double spring safety valve**. We keep the valve with the inlet flange un-drilled, this allows us to drill to client requirements. The 520 series has been designed primarily for use on unvented hot water heating systems, where a high capacity emergency steam relief capability is required.

Sizes: DN65, DN80, DN100.
Connections: Flanged inlet x BSP outlet.
Set pressure range: 0.4 to 12.5 Barg.
Maximum temperature: 195°C.

The **Bailey 746 Conventional Safety Relief Valve** for Steam duty. As we keep this valve un-drilled, we can drill to client requirements. The 746 series is a good addition to our already extensive stock portfolio of the Bailey product range.

Size range: 25mm x 40mm through to 100mm x 150mm.
Material: Carbon Steel.
Connections: Flanged, drilled to client requirements.
Options: Marine open lever or Dome cap.

Here for you when the Pressure matters.
