

HAWTHORN  
HOUSE

# The Home of Fine Fragrance

It started in a tea cup.

Hawthorn House® is synonymous with elegance and sophistication, offering a range of luxury candles and home fragrance.

The company was borne out of a passion for fragrance by founder Tami Murray, who's love of creating beautiful scents began at the tender age of six with her first 'exquisite rose perfume' fashioned with rose petals and water from her Mother's garden.

Today Tami is renowned for her ability to create and capture a beautiful bouquet, by combining interesting and often unusual ingredients which are blended to create unique scents. Her uncompromising standards of perfection means that each product is hand finished creating the perfect fragrance experience.

HH pride themselves on sourcing the finest raw materials. In particular the wax used is from a secret blend of the green credentials refined mineral waxes using only cotton wicks, giving a clean even burn with the maximum scent throw. This is what sets the HH brand apart from others on the market.

Her first ever candle was produced in this very teacup which she sourced from a local charity shop.

## A love of travelling and absorbing cultures

has formed memories that have greatly influenced Tami's individual creations. Blends of orange blossom are taken from her time spent in California where the fragrant scent perfumes the air, whilst Eastern travels have inspired more earthy tones and rich spices.

Taking such powerful, memory evoking scents and pairing with exquisite ingredients, has resulted in a range of versatile products that will dress your home with the finest fragrances.

*"I hope you enjoy my collection as much as I have enjoyed creating it."*

*Tami x*
