1. Product Identification

Product name: WR-LPU Color Clear Base(s) – Decatur Black, Camano Red, Fox Orange, Mercer Green, Lopez Blue, Shaw Blue, Sinclair Yellow

SDS Number: 18XXA00

Product type: Polyurethane Dispersion Mixture

Recommended use of the chemical and restrictions on use: Marine top coat paint.

Restrictions: None known

Manufacturer/Supplier information

Company name: SYSTEM THREE RESINS, INC.
Address: 8517 Commerce Place Dr NE
          Lacey, WA 98516
          United States
Telephone: 1-253-333-8118
Website: www.systemthree.com
Email: support@systemthree.com
Emergency Contact:
CHEMTEL (U.S. and CANADA) 1-800-704-9215
CHEMTEL (Outside the U.S.) – Call Collect accepted +1-360-256-7365

2. Hazard(s) Identification

Classification of substance or mixture/Signal Word: DANGER
Toxic to Reproduction (Unborn Child) – Category 1B

GHS Label Elements
Hazard Pictograms

Hazard Statements/Classification of substance or mixture

H360 May damage fertility or the unborn child.

Precautionary statements

Precautionary Statements
Prevention

P201 Obtain special instructions before use.
P202 Do not handle until all safety precautions have been read and understood.
P280 Wear protective gloves/protective clothing/eye protection/face protection.

Response
P308 + P313 IF exposed or concerned: Get medical advice/attention.

Storage
P405 Store locked up.

Disposal
P501 Dispose of contents in accordance with local/regional/national/international regulations.

Hazards not otherwise classified (HNOC)
Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation.
3. Composition/Information On Ingredients

<table>
<thead>
<tr>

<td>57-55-6</td>
<td>1 – 5%</td>
</tr>
</tbody>
</table>

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

4. First-Aid Measures

**Skin contact**
Wash skin thoroughly with soap and water or use recognized skin cleaner. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention if irritation persists. Wash clothing before reuse. Clean shoes thoroughly before reuse.

**Eye contact**
Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contacts lenses. Continue to rinse for at least 10 minutes. Get medical attention.

**Ingestion**
Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as collar, tie, belt or waistband.

**Inhalation**
If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

**Indication of immediate medical attention and special treatment needed, if necessary**

**Notes to physician**
In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

**Specific treatments**
No specific treatment.

5. Fire-Fighting Measures

**Suitable extinguishing media**
All extinguishing media are suitable.

**Unsuitable extinguishing media**
None known.
### Specific hazards arising from the chemical

In a fire or if heated, a pressure increase will occur and the container may burst. This material is harmful to aquatic life. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

### Hazardous decomposition products

Decomposition products may include the following materials:
- Carbon dioxide
- Carbon monoxide
- Nitrogen oxides
- Aldehydes
- Organic acids

### Special protective actions for fire-fighters

Promptly evacuate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

### Special protective equipment for fire-fighters

Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Further information

This material will not support combustion unless the water has evaporated.

### 6. Accidental Release Measures

#### Personal precautions

No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear properly fitted NIOSH certified respirator when ventilation is inadequate. Wear the appropriate personal protective equipment.

#### Emergency procedures

If specialized clothing is required to deal with the spillage, take note of any information in section 8 on suitable and unsuitable materials. See also information in “For non-emergency personnel”.

#### Methods and materials for containment/cleanup

Stop leak if without risk. Ventilate area. Move containers from spill area. Dilute with water and mop up. Alternatively, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

#### Environmental precautions

Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil).

### 7. Handling and Storage

#### Precautions for safe handling

Always wear personal protective equipment when handling (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. Avoid exposure – obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear an appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

#### Precautions/Recommendations for safe/proper storage

Store between 40 to 90 °F (4-32 °C). Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, out of the reach of children or pets. Keep container tightly closed and sealed until ready for use.
8. Exposure Controls/Personal Protection

</tbody>
</table>

#### Appropriate engineering controls
- Use only with adequate ventilation. Wear personal protection equipment when handling.

#### Environmental exposure controls
- Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

#### Individual protection measures/Personal protective equipment

- **Eye/face protection**: Splash proof goggles or safety spectacles with side shields are recommended.
- **Hand protection**: Always wear impervious gloves, neoprene, vinyl or rubber.
- **Skin protection**: Wear clean, body-covering clothing to avoid skin contact.
- **Respiratory protection**: Use a properly fitted NIOSH certified respirator, or air-fed respirator complying with an approved standard if risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
- **Special instructions for protection and hygiene**: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking, and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

9. Physical and Chemical Properties

- **Chemical family**: Aqueous Urethane
- **Appearance**: Aqueous solution
### Physical State
- **Aqueous solution**
- **Form**: Liquid
- **Color**: Varies
- **Odor**: Mild

### Density (Specific Gravity)
- **8.74 lb/gal (1.05)**

### Viscosity
- **800 cps @ 25°C**

### pH
- **8 – 8.5**

### Melting point/freezing point
- Data not available

### Initial boiling point and boiling range
- Approximately 212 °F (100 °C)

### Flash point
- >212 °F (100 °C) Closed Cup

### Evaporation rate
- Data not available

### Flammability (solid, gas)
- Data not available

### Upper/lower flammability limit (by volume)
- Data not available

#### Upper flammability limit (by volume)
- Data not available

#### Lower flammability limit (by volume)
- Data not available

### Material VOC
- ≤370 grams/liter

### Vapor density
- Heavier than air

### Relative density
- Not determined

### Solubility in water
- Data not available

### Partition coefficient: n-octanol/water
- Data not available

### Auto-ignition temperature
- Data not available

### Decomposition temperature
- Data not available

### Stability and Reactivity

#### Reactivity
- No specific data.

#### Chemical Stability
- Stable.

#### Possibility of hazardous reactions
- Hazardous polymerization will not occur.

#### Conditions to avoid
- No specific data.

#### Incompatible materials
- No specific data.

#### Hazardous decomposition products
- No specific data.

#### Other hazards
- None known.

### 11. Toxicological Information

#### Acute Health Hazard (components)
No comprehensive data (ingestion, inhalation, dermal) on mixture (product).

**Mutagenicity**

No information on product itself.

**Carcinogenicity**

No information on product itself.

**Reproductive Toxicity**

No information on product itself.

**Teratogenicity**

No information on product itself.

**Specific target organ toxicity (single exposure)**

No information on product itself.

**Specific target organ toxicity (repeated exposure)**

No information on product itself.

**Aspiration hazard**

No information on product itself.

**Potential acute health effects**

**Eye Contact**

No known significant effects or critical hazards.

**Inhalation**

May cause respiratory irritation. Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.

**Skin Contact**

Causes skin irritation.

**Ingestion**

Corrosive to digestive tract. Causes burns.
Symptoms related to the physical, chemical and toxicological characteristics

**Eye Contact**
No specific data.

**Inhalation**
Adverse symptoms may include the following:
- Reduced fetal weight
- Increase in fetal deaths
- Skeletal malformations

**Skin Contact**
Adverse symptoms may include the following:
- Irritation
- Dryness
- Cracking
- Reduced fetal weight
- Increase in fetal deaths
- Skeletal malformations

**Ingestion**
Adverse symptoms may include the following:
- Stomach pains
- Reduced fetal weight
- Increase in fetal deaths
- Skeletal malformations

**Delayed and immediate effects and also chronic effects from short and long term exposure**
No information on product itself.

**Potential chronic health effects**
No information on product itself.

13. Disposal Considerations

Waste from residues/ unused products  The generation of waste should be avoided wherever possible. Disposal of this product should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus product via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Contaminated packaging  Dispose of container and unused contents in accordance with federal, state and local requirements.

14. Transport Information
The data provided in this section is for information only and may not be specific to your package size or mode of transport. You will need to apply the appropriate regulations to properly classify your shipment for transportation.
