# OUR MISSION

We are committed to protecting and enhancing your vision to bring your shooting, and your life, to the next level. Our mission is to spread the word that safety eyewear is necessary, not just on the jobsite and sporting activities, but also in day-to-day life. We encourage experiences and exploration of this nation's greatest outdoor spaces using our excellent protective eyewear.

# WHO WE ARE

We are just like you. We desire the most out of life. Established in the scenic state of Washington, where the grandeur of the outdoors, constantly lends us inspiration and creative ideas.

We encourage you to experience and explore the magnificent uniqueness of our country. We understand the importance of safeguarding your eyes and have evolved our proprietary a-Eye™ and NVR/fog™ Lens Technology to Outperform Nature!

The inspiration to see nature in perfect clarity is dedicated to "Grandpa" Don who lost an eye as a child, whose fishing stories, perhaps exceeded his fishing. His love for life and the outdoors was contagious.

# CORE VALUES

## AUTHENTIC EXPERIENCES

We believe that vision should be an experience. We don't think it does our beautiful world justice to just go through the motions of life; we want our customers to experience it in a-Eye™.

## THE AMAZING OUTDOORS

We love and appreciate all the outdoors has to offer. We urge you to do more outdoors and experience all of the hidden gems our country has to offer.

## THE NEXT GENERATION

We are zealous about empowering the next generations with a passion for outdoors that will last a lifetime. We believe that the youth are the key to continuing the success of shooting sports and outdoor lifestyle.

## INCLUSIVE

Everyone and anyone is welcome at our "campfire". We design product lines fit for every adventurer, from hunters to competitive shooters, and for those simply exploring the great outdoors.

---

SSP  
EYEWEAR™  
TECHNOLOGY

---

### **A-EYE™ LENS TECHNOLOGY**

SSP Eyewear™ has spent countless hours perfecting color and light management to provide the ultimate benefit to our customers. Our lenses allow our customers to dynamically change the sight picture both with filtration and light management. This is a huge advantage in critical target acquisition.

### **COLOR MANAGEMENT**

Each of the SSP lens kits introduces multiple filtration curves in the same lens. By introducing a higher transmittance curve with a lower transmittance curve in the same lens, the eye can effectively utilize

the color saturation to actively manage sight picture definition. For Target shooters the opportunity to “dial-in” the visual intensity of the target can literally make or break their shot.

### **SAFETY. STRENGTH. COMFORT.**

SSP Eyewear™ is an eyewear industry leader in eyewear frame material construction. We have spent years perfecting the materials we use and pride ourselves on providing our customers a product that stands the test of time and use. We use high-performance rubber compounds and hypoallergenic materials.

### **ENGINEERED FOR THE NEEDS OF YOU.**

We have lifelong friendships, sponsorships, and relationships with athletes that are the elite in their industry/segment. In working with them, we have crafted and refined frame geometries that are designed with trap shooting professionals, avid sportsmen, frontline workers, and the culinary industry all fully in mind. We have considered the performance needs, the weight, and balance, as well as the overall comfort.

---

# TOTAL CLARITY DYNAMIC LIGHT MANAGEMENT

---

## A-EYE™ LENS TECHNOLOGY

We take light management seriously at SSP. As outdoor enthusiasts, we test all products to their limit from using them in activities such as skiing, shooting, motocross, rafter, to working in the shop or out on the golf course. With our a-Eye™ and NVR/fog™ Lens technology, we aim to enhance each of these experiences with superior light and color management for maximum versatility and functionality. Our products have variable light transmission values to provide the best vision no matter what lighting conditions you may face. Available in a wide array of colors, a-Eye™ SSP lenses focus on various colors on the visual spectrum to emphasize colors such as red, green, and orange. All of our products provide UVA/UVB UV400 protection and anti-scratch hard coated lenses.

## **ENHANCED NVR/FOG™ A-EYE™ LOW LIGHT LENSES**

76% light transmission

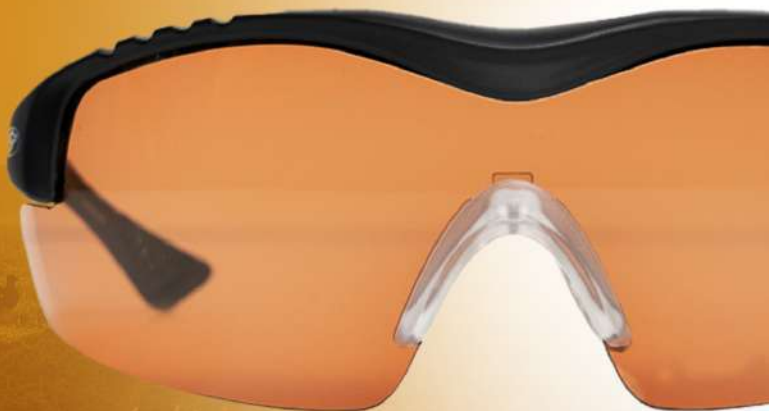

Used to enhance orange targets in very low light conditions with a green background or for shooting under the lights at night. Filters light for those with red/green color vision deficiency to provide a more accurate color ratio.

## **ENHANCED NVR/FOG™ A-EYE™ MEDIUM LIGHT LENSES**

53% light transmission

Used to enhance orange targets in medium light conditions against forest or green backgrounds. Filters light for those with red/green color vision deficiency to provide a more accurate color ratio.

## **ENHANCED NVR/FOG™ A-EYE™ DARK ORANGE LENSES**

32% light transmission

Our a-EYE™ Dark Orange lens is designed to enhance your vision of the color orange with increased definition and clarity. This is a total game-changer for clay target shooters to lock in and take the perfect shot. This lens focuses specifically on the color orange on the visual spectrum to give athletes the capability to acquire their target quickly and accurately.

## **ENHANCED NVR/FOG™ A-EYE™ DARK PURPLE LENSES**

32% light transmission

Dark Purple minimizes blue and green backgrounds in medium to bright light conditions, allowing you to acquire your target up to 10 times faster. This enhanced lens minimizes the background noise that may cause an unnecessary distraction away from your target.

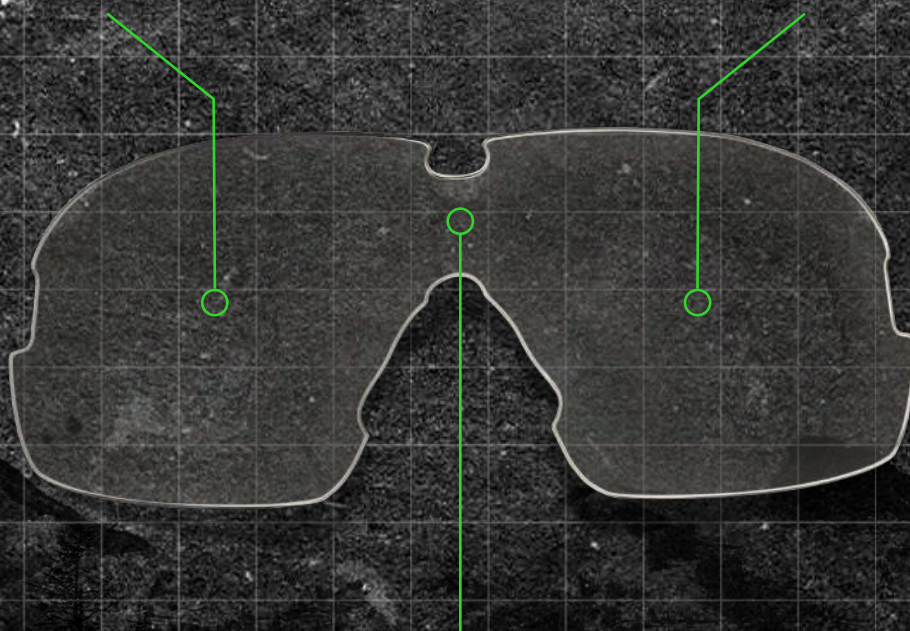

### **FASHIONABLE**

87% of eye injuries occur because people were not wearing safety glasses. People do not wear safety glasses because they are unfashionable, uncomfortable and hinder their view. SSP is dedicated to creating safety sunglasses that are fashionable, comfortable and beg to be worn.

### **HIGH QUALITY DECENTERED LENSES**

Have you ever worn a cheap pair of glasses and ended up with a headache? All SSP lenses are designed with high-quality optically correct Decentered Lenses. This feature makes the lenses optically correct (so that the center of the lenses align with your pupils) for better vision and to eliminate refraction on curved lenses.

### **SHATTERPROOF LENSES**

SSP's safety lenses are prepared with a superior anti-scratch coating and shatterproof polycarbonate. They have been rigorously tested by labs approved by the ANSI (American National Standards Institute), a private non-profit organization that provides the standard that OSHA upholds and enforces. All SSP safety sunglasses meet or exceed ANSI Z87+ and are marked on the temple and at least one lens. Each pair of safety glasses is tested with a complex machine that shoots a 1/4 inch steel ball at over 100 mph.

SSP  
EYEWEAR™  
LENSES

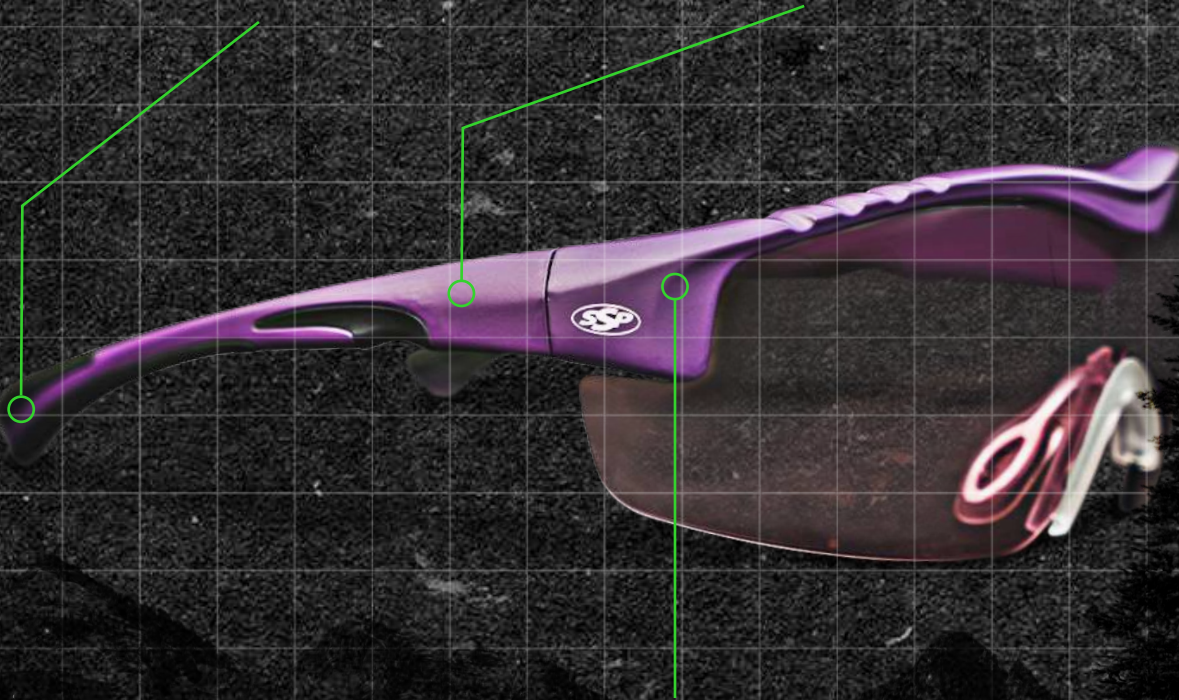

#### **RUBBER TIPS**

A unique rubber compound that is permanently attached, is soft and pliable for nose pads and temple tips. As it is exposed to moisture from perspiration and body heat it becomes tacky, securing your glasses to your face.

#### **TEMPLES**

Uniquely designed to be flexible to minimize pinching and are comfortable for all-day use. They are so comfortable, you might not even realize your safety glasses are on your face.

#### **INFRANGIBLE FRAMES**

The frames are designed precisely to position your safety sunglasses to three points of contact; you'll experience a fit that's free of unwanted pressure points. The wrap around design positions the lenses in a way that guarantees the widest and clearest field of vision possible and minimizes distortion. They are lightweight, flexible....weather resistant, and temperature resistant material. 95% of the frames are available in a high-quality pearl paint finish in popular colors.

## METHOW (MET-how) RIVER

The Methow River (/ˈmethəʊ/ MET-how)[6] is a tributary of the Columbia River in northern Washington in the United States. The river's 1,890-square-mile (4,900 km<sup>2</sup>) watershed drains the eastern North Cascades, with a population of about 5,000 people. The Methow's watershed is characterized by relatively pristine habitats, as much of the river basin is located in national forests and wildernesses. Many tributaries drain the large Pasayten Wilderness. An earlier economy based on agriculture is giving way to one based on recreation and tourism.

Wikimedia Foundation. (2021, January 9). Methow River. Wikipedia. [https://en.wikipedia.org/wiki/Methow\\_River](https://en.wikipedia.org/wiki/Methow_River).

## METHOW KIT

Our Methow Kit is designed to provide shooters with a variety of colored lenses so that you can adjust your lens to fit any lighting situation. When it comes to shooting, the color of your eye protection can drastically change what you see. From enhancing your vision in various light conditions to improving visual clarity, our Methow kits provide unmatched versatility in any shooting scenario.

- NVR/fog™ Technology for unimpaired vision
- Dynamic light management for shooting in any condition
- Adjustable nose piece for ultimate comfort
- Infrangible frames for maximum protection
- Exceeds ANSI Z87.1+2015 standards
- a-Eye™ technology

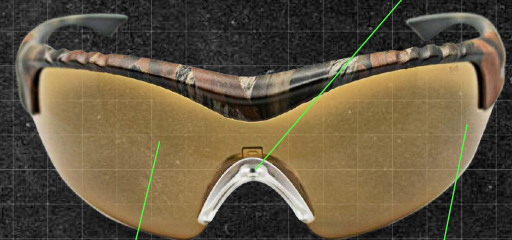

**Uses:** All shooting disciplines, Hunters, Archers, Mountain bikers, Outdoor enthusiasts

# LOCK IN YOUR SIGHTS LIKE YOU'RE 25 AGAIN!

## TOP FOCAL®

Attention pistol shooters, hunters and instructors who are struggling to see your front sights clearly, the Top Focal® Assorted Kit is your solution for an in-focus, crystal clear shot. As you age, it is normal to experience changes in your eyesight. For shooters, this can be the differentiating factor in hitting that target or taking the perfect shot at a trophy while hunting.

- Shatterproof lense
- 100% UVA/UVB protection
- NVR/fog™ Technology + venting
- Comfortable rubber ear and nose pads
- Interchangeable lenses for dynamic light management
- Includes full set of upper magnification bifocals and zero magnification
- Exceeds ANSI Z87.1+2015 safety standards
- a-Eye™ technology

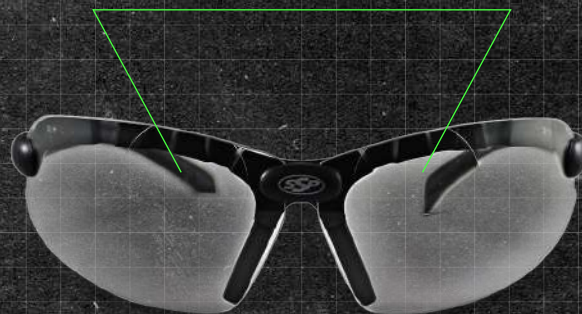

**Uses:** Upper bifocals for shooters that need readers, or for those that do a lot of overhead work.

## SSP SPORTSMAN EYEWEAR

Our sportsman lenses are designed to enhance your vision in competition or out hunting in the field. These lenses block blue light, which scatters faster than other lights and makes focusing on objects difficult. Removing blue light improves sharpness and depth perception and reduces eye fatigue. Each pair of glasses is manufactured with a comfortable, durable nylon frame with rubber nose pads for extended use. Our lenses feature NVR/fog™ Technology to eliminate moisture and keep your vision clear.

PERFECT VISION?  
LET'S KEEP IT  
THAT WAY.

## CHELAN (shə-LAN) LAKE

Lake Chelan is a narrow, 50.5-mile (81.3 km) long lake in Chelan County, north-central Washington state, U.S. Before 1927, it was the largest natural lake in the state by any measure. Upon the completion of Lake Chelan Dam in 1927, the elevation of the lake was increased by 21 feet (6.4 m) to its present maximum-capacity elevation of 1,100 feet (340 m). Two communities lie on the southern end of the lake, and a third sits at the far north end, providing a gateway to the North Cascades National Park.

Wikimedia Foundation. (2021, October 4). Lake Chelan. Wikipedia. Retrieved November 3, 2021, from [https://en.wikipedia.org/wiki/Lake\\_Chelan](https://en.wikipedia.org/wiki/Lake_Chelan).

## CHELAN

Perfect for shooters who still have good eyesight! One of our most popular kits, the Chelan is better than any other shooting glass because of a-Eye™ technology, it features a tough nylon matte black frame and NVR/fog™ venting between the frame and lens. Our assorted kit has interchangeable NVR/fog™ lenses in amber, clear & smoked which allows you to personalize the shooting glasses to view your front sight in a variety of light conditions. Stay focused, on-target and get your kit today!

## CASCADE (ka·skaydz) MOUNTAINS

The Cascade Range or Cascades is a major mountain range of western North America, extending from southern British Columbia through Washington and Oregon to Northern California. It includes both non-volcanic mountains, such as the North Cascades, and the notable volcanoes known as the High Cascades. The small part of the range in British Columbia is referred to as the Canadian Cascades or, locally, as the Cascade Mountains. The latter term is also sometimes used by Washington residents to refer to the Washington section of the Cascades in addition to North Cascades.

Wikimedia Foundation. (2021, November 17). Cascade range. Wikipedia. Retrieved November 22, 2021, from [https://en.wikipedia.org/wiki/Cascade\\_Range](https://en.wikipedia.org/wiki/Cascade_Range).

## SSP WORK EYEWEAR

While you're on the job, let us do ours by protecting your vision. We offer a wide range of industrial eyewear products for anyone working in an industrial setting. Our safety glasses are OSHA approved and sure to keep your eyes safe on the job. While working in this type of setting, it's essential to protect eyes from becoming irritated from wind, dust, brass, powder and debris, not to mention any other gases or harmful chemical fumes that may be in the air. SSP Eyewear™ takes traditional safety glasses to the next level by designing products with quality, style, and durability in mind.

DON'T BE IN DENIAL ABOUT  
YOUR NEED FOR READERS,  
JUST BUY THE GLASSES.

## DENIAL

Our Denial Bifocal safety glasses kit includes bottom bifocal lenses in three colors. Our denial lenses allow you to see up close and at a distance for comfortable 24 hour use without eye strain. This kit comes with interchangeable lenses in amber, clear & smoked which allows you to personalize the shooting glasses to view your front sight in a variety of lighting conditions.

- Shatterproof lense
- 100% UVA/UVB protection
- NVR/fog™ Technology + venting
- Exceeds ANSI Z87.1+2015 safety standards
- Comfortable rubber ear and nose pads
- Includes full set of bottom magnification bifocals in 3 colors
- Interchangeable lenses for dynamic light management

## ENTIAT (en·tee·at) MOUNTAINS

The Entiat Mountains, or Entiat Range is a mountain range in the U.S. state of Washington. Located west of the Columbia River, north of the Wenatchee River, and south of the Entiat River, the range is part of the North Cascades section of the Cascade Range. The Entiat Range is relatively narrow east to west and long north to south. The Entiat River valley separates the Entiat Mountains from the Chelan Mountains to the northeast. To the west and south, across the Wenatchee River and tributaries such as the Chiwawa River are the Wenatchee Mountains.

Wikimedia Foundation. (2021, January 15). Entiat Mountains. Wikipedia. Retrieved October 28, 2021, from [https://en.wikipedia.org/wiki/Entiat\\_Mountains](https://en.wikipedia.org/wiki/Entiat_Mountains).

## ENTIAT

The Entiat's are one of our most popular glasses and are great for shooting, reading and close up work. Plus, since the invisible magnifying area (the bifocal) is at the bottom of the lens, you can still see afar, making them great for all-day wear.

- Available both in a-Eye™ clear, NVR/fog™ and a-Eye™ Mirror
- Permanent, durable anti-scratch lense
- 100% UV400 UVA/UVB protection
- Exceeds ANSI Z87.1+2015 safety standards
- Approved by the National Tactical Officers Association.
- Comfortable rubber ear and nose pads
- Regular lenses and Bifocals available in 1.25, 1.50, 2.00, 2.50 or 3.00 magnification power
- a-Eye™ technology

**Uses:** For those that need bifocals, reading, all-day wear, shooting, close-up work.

# POLARIZED PRODUCTS

ACTIVITY

SPORTSMAN

WORK

POLARIZED

## SSP POLARIZED PRODUCT

Our polarized lenses are created out of a special chemical film that helps reduce glare. Glare is caused when light from the sun is reflected off of water or a solid surface. By neutralizing glare, polarized lenses help you see objects more clearly, and also help reduce the harmful effects of UV light. Glare reduces your depth perception, distorts your view and color perception, and can even temporarily blind you. The chemical filter on the lenses of polarized sunglasses is designed to absorb horizontal light waves, while still allowing vertical waves to pass through. Because light only travels in one direction through polarized lenses, glare is eliminated.

WE THINK NOT  
BEING ABLE TO SEE  
CLEARLY IN SUNNY  
CONDITIONS IS A  
GLARING ISSUE.

## MAZAMA SEA READERS

Whether you're on the golf course or out on the lake, these shatterproof polarized bifocals are essential. The built-in bifocal magnification is actually ground into the lens; no stick on magnification here! Mazama's polarized lenses are made with a thicker sheet of film to offer more impact resistance than a traditional 0.75 mm lens.

- 100% UV400 UVA/UVB protection
- Flexible temples with strap holes
- Polarized lenses to eliminate glare
- Exceeds ANSI Z87.1+2015 safety standards
- Comfortable nose pads for all day wear
- Bifocals available in 1.50, 2.00, or 2.50 magnification power
- a-Eye™ technology

**Uses:** For those that need bifocals, boaters, skiers, fishermen, water-sports, beach & poolside use, golfing, cycling, and joggers.

## MAZAMA (muh·zaa·muh) WASHINGTON

Mazama is an unincorporated community in Okanogan County (population 158) located in the Methow Valley of Washington, on the east slopes of the North Cascades and North Cascades National Park. It is located along the North Cascades Highway (Highway 20), 14 miles (23 km) northwest of Winthrop and about 28 miles (45 km) south of the Canada–United States border. Mazama's town center elevation is 2,106 feet (642 m), and it is located 2.7 miles (4.3 km) south of and 4,895 feet (1,492 m) below Goat Peak.

Wikimedia Foundation. (2021, July 29). Mazama, Washington. Wikipedia. [https://en.wikipedia.org/wiki/Mazama,\\_Washington](https://en.wikipedia.org/wiki/Mazama,_Washington).

# MAP/ TESTIMONIALS

**BRIAN B.** ★ ★ ★ ★ ★

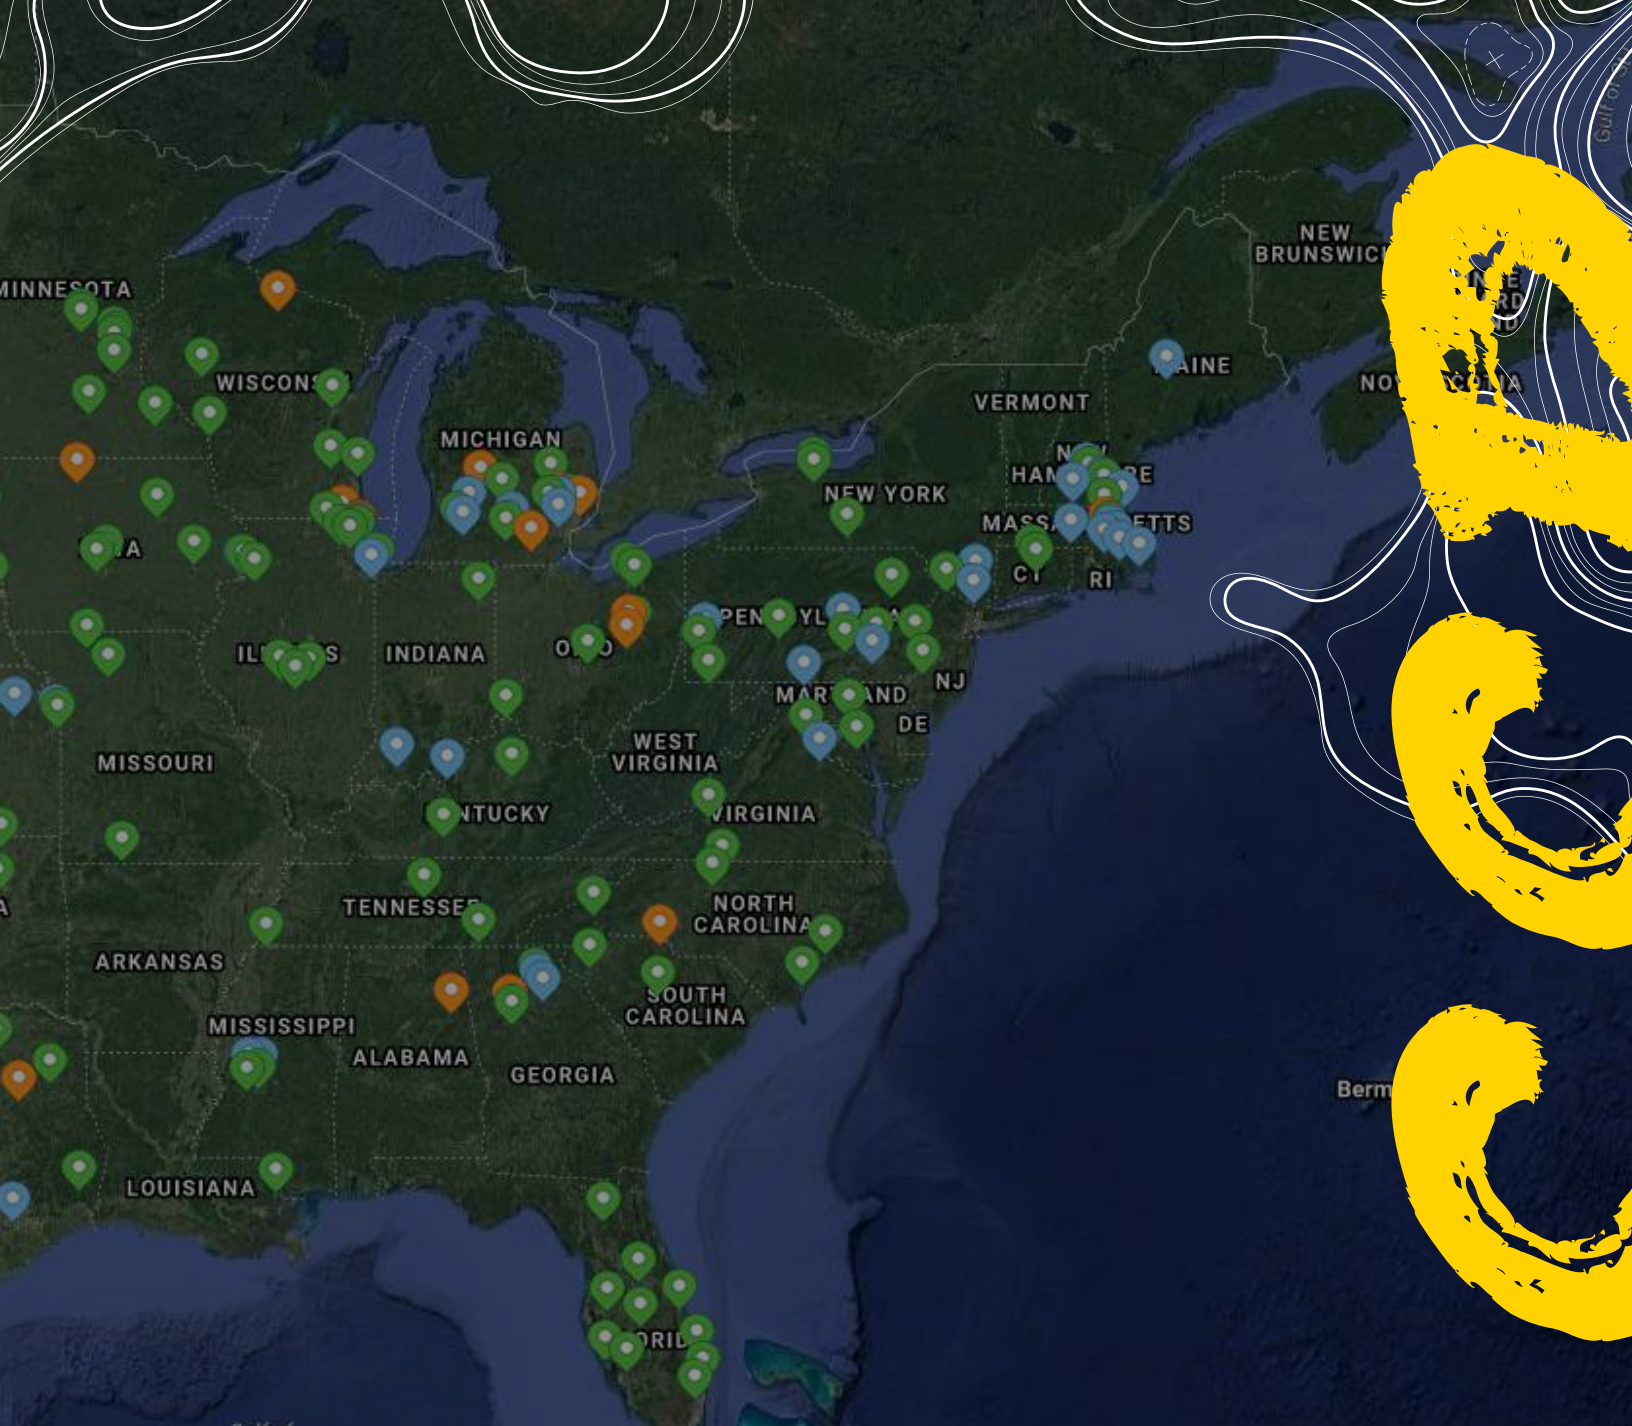

*"I have been very impressed by these glasses. I have been wearing a pair for a couple hours this afternoon while working on a carpentry project. Where most glasses start to irritate my face after a while, I barely notice I have these on. They're super comfortable.*

*I also like that they're styled in a way that I can work on projects, take them shooting, or even just wear them around town when it's bright outside. They are the perfect combination of sunglasses and safety glasses."*

**PATRICK C.** ★ ★ ★ ★ ★

*"Putting the near-vision lens on top is a great idea. After a bit of practice, I could easily get great front-sight focus as I was pressing out during presentation of my pistol. I had young eyes again. Yes, the target is out of focus, but if you're focusing on the front sight -- which you're doing, right? -- this product is a great help and is fun to shoot with. I wore them for a week at Gunsite. I appreciated having the different lenses as well. Dark for outdoor, daylight shooting. Changing them out is easy. Clear for the night shoot. As a bonus, my tritium sights looked fantastic in focus!"*

**MARK H.** ★ ★ ★ ★ ★

*"Great customer service. I ordered the wrong magnification, called SSP and spoke to Mike. He took the time to explain his eye wear and how to pick the right magnification for your eyes . After talking for awhile I realized he was the owner. It was nice to see that a company ,especially the owner would take the time out. to talk about his product. The magnification on SSP Eyewear™ works as advertised, great product. I will definitely be buying more eye wear from SSP."*

**JENNIFER B** ★ ★ ★ ★ ★

*"I am very happy with many of the glasses from Specialized Safety Products. The great thing about them is that they are safety glasses but they don't have the "dorky" look that you would associate with safety glasses. They are a good looking, attractive, and stylish glass. Nobody has every told me, "Nice safety glasses." But I have gotten compliments when wearing them as people think that they are sunglasses."*

**B.H.** ★ ★ ★ ★ ★

*"Excellent product overall but in my opinion, the diopters need to be a 1/2 inch wider (outward) and 1/4th of an inch down to give the shooter a slightly better field of view. A significant amount of the upper part diopter is obscured by the frame and the manufacturer should account for this and adjust it. Still, it is a quality product which I recommend."*

**HENRY M** ★ ★ ★ ★ ★

*"I like to keep track of my shooting results while I'm on the range., With this eyewear I can shift from long range view to reading very easily. Good looking, great selection of lenses included, and a very reliable case. This is a winner."*

**FERN T.** ★ ★ ★ ★ ★

*"Ahh to be able to clearly see my pistol sights again!! I should have listened to my fathers advice, " never get old" Excellent design, just ordered a spare set!"*

**TIMOTHY** ★ ★ ★ ★ ★

*"I bought these to use while shooting trap. The different colored lenses are great for matching the lighting conditions. The lenses are big, clear, and do not distort objects. My only minor dislike is that it's difficult to get the pieces to reconnect once they are all apart. This might get easier in time and for the price I can't complain. At least one thing, they aren't falling apart on my face. If you're looking for a pair of shooting glasses to use for local competition and at a price that won't break the bank I would recommend these."*

**CODY J.** ★ ★ ★ ★ ★

*"These glasses are fantastic. They have such a large field of view so they don't block your vision at all for shooting when it's critical that you don't have any blind spots. The clarity is extremely great, and the different lenses for different conditions are super helpful. Not to mention a convenient carry case for the kit, and protective microfiber pouch for the glasses. Would definitely highly recommend for any shooter, especially for trap and skeet/birt hunting."*

**JOYCE M.** ★ ★ ★ ★ ★

*"My husband is completely blind in one eye and very limited sight the other eye; the eye doctor told him to get some shatter proof glasses to protect the sight ; he loves them; they look good and are comfortable"*

**JERROD K.** ★ ★ ★ ★ ★

*"I work in a production facility that requires us to wear safety glasses and face masks all the time, regardless of coronavirus. We always have this requirement. I work in a variety of temperature controlled environments. I have put on our required mace mask and tested these by leaving them out in the heat, putting them in the freezer, going from a hot to cold place and vice versa in both circumstances. My biggest test was going from cold and dry to hot and humid and they held up. There will ALWAYS be some fog but these cleared in seconds. The bifocal range is perfect for me since the magnifying area doesn't interfere with my normal far vision range, but if I need to look at a piece of paperwork, the glance downwards transitions well. If you need to tip your head back to look through the magnified area, you need to get prescription safety glasses. This isn't the solution for you."*

**GEORGE B.** ★ ★ ★ ★ ★

*"I wear theses glasses everyday while riding a motorcycle and ordered them with the bifocal lenses and I am impressed with the comfort, fit and durability. The cost for 2 pairs is very reasonable. I did notice the arms will peel over time and I attribute this to the helmet, sweat and sunscreen I use daily. Otherwise great product for the price."*
