The eyelid skin is **4x thinner** than the skin on the face and requires specific ingredients to provide night time skin barrier protection.

Do you wake up in the morning with your eyes feeling and looking tired? Use this limited ingredient, preservative free formula to address fine lines and aging skin. Safe for meibomian glands and the tear film.

Ever heard of spin trap? Enjoy the benefits of this intelligent anti-oxidant. Spin trap grabs free radicals and converts them to usable oxygen for the eyelids. Think: moisture. And yes – this all happens while you are sleeping.

KEY INGREDIENTS:

Oryza Sativa Rice Bran Oil

High linoleic and other essential fatty acid content (Omega-6,9). A natural ceramide known for its high levels of gamma oryzanol and tocotrienol antioxidants. Tocotrienol works much like Vitamin E. Reduces tyrosinase activity & inhibits MMP-9.

3x Cholesterolo Complex

Plant based cholesterol esters that are harvested and processed into liquid crystals. The prismatic effect of the liquid crystals create the color. The cholesterol works to provide unique emollient and protective benefits.

Zea Mays Silk Corn Extract

Possesses unsaturated linoleic (Omega-6) oleic (Omega-9) essential fatty acids. Provides emollient and moisturizing benefits. Antioxidant due to tocopherol (Vitamin E) content.

Spin Trap

It is a highly active complex of oxygen and nitrogen considered to be an intelligent antioxidant because instead of destroying free radicals, it works to trap and convert them into useful oxygen for continued cell metabolism.

FULL INGREDIENT LIST: Cholesteryl Oleyl Carbonate, Cholesteryl Nonanoate, Cholesteryl Stearate, Oryza Sativa (Rice) Bran Oil, Zea Mays (Corn) Silk Extract, Phenyl t-ButylNitrone (Spin Trap)
