

TB12 ELECTROLYTES

What are TB12™ Electrolytes?

TB12™ Electrolytes are a natural mineral concentrate that enable athletes to turn any liquid into a hydrating sports drink enriched with 72 trace minerals extracted from sea water.

TB12™ Electrolytes contain no added preservatives, flavors, or sweeteners.

How can I use TB12™ Electrolytes?

TB12 Electrolytes should be mixed with water, juice, or another liquid of your choice.

We recommend adding a squeeze of TB12™ Electrolytes to 8 oz. of liquid — this will help to mask the concentrated mineral flavor. If the resulting mineral taste remains too strong, simply dilute the mixture with additional liquid until you reach a palatable level.

How are TB12™ Electrolytes made?

TB12™ Electrolytes are harvested, not made. The natural ionic trace mineral blend used in TB12™ Electrolytes originates in water from an inland sea that is naturally evaporated to increase concentration.

We are committed to producing safe products of high quality, so the facilities we use to produce TB12™ Electrolytes are FDA CGMP certified (Good Manufacturing Processes) through the Natural Products Association.

What minerals are included in TB12™ Electrolytes?

TB12™ Electrolytes contain 72 ionic trace minerals in varying amounts as found in sea water, including sodium, potassium, magnesium, chloride, sulfate, calcium, silicon, selenium, phosphorus, iodine, chromium, manganese, iron, copper, molybdenum, zinc, & vanadium.

Supplement Facts

Serving Size 1/20 bottle (2.5 mL / 1/2 tsp.)
Servings Per Container: 20

	Amount Per Serving	% Daily Value
Sodium	125 mg	5%
Potassium	130 mg	4%
Magnesium	45 mg	11%
Chloride	390 mg	11%
Sulfate	20 mg	**
