

It's not just one thing, it's everything. Whatever you are looking to get out of your body, you need nutrient-rich foods to fuel that output, and if you aren't putting the right things into your body, you won't be able to perform your best. Peak performance is the result of every decision you make. From the water you drink, to the food you eat, to the exercises you perform, to the sleep you get — every choice matters. We developed the TB12 Grocery List to make it easier for you to prioritize eating nutrient-rich whole foods like organic fruits, vegetables, and lean meats to fuel your body with the proper nutrients.

Choose meats and poultry that are organic, grass-fed, free-range, hormone-free, and antibiotic-free. Fish should be wild, hormone-free and antibiotic-free.
