

**After much anticipation, pre-order for the colorful Seals Model A.5 has begun!**

This unique collaboration will mark the end of production for the inaugural Model A series. We teamed up with designer, and long-time friend @teenage.grandpa (Matt Smith-Johnson) to make this special collection happen. Our collaboration was inspired by the colorful watches of the 1970's, and Matt's unique sense of style and design.

From the lollipop style seconds hand, to the sans serif roman numerals, this collaboration pulls together some uncommon but enjoyable features we rarely see from the major Swiss Brands.

Giving the consumer some options, the Model A.5 will be available in both "Acid Green" and "Burgundy Roulette" configurations: The chapter ring on Acid Green model uses a special pigment that is much brighter than a standard neon green. You could say it's the greenest green imaginable, and it's not something you're going to find elsewhere. As for the Burgundy Roulette, the tri-color 24 hour chapter ring brings a bold retro flair to the collection. The end result is a watch that's warm in tone yet visually energetic.

This colorful collection sends the Model A.5 series off with a bang. Available for \$800 USD each, we hope you have as much fun wearing it as we had creating it.
