

# FARER

AINSDALE

MODEL

FLYBACK CHRONOGRAPH QUARTZ

COMPLICATION

ETA 251.294 FK

MOVEMENT

The dial is the defining feature of any Farer watch and the Ainsdale takes our use of colour combinations to new developments using a rich gloss ink blue vintage curved dial + matching date wheel, framed by sky blue outlined English numerals infilled with raised Grade A Super-LumiNova in light orange. Punched through the main dial design are the recessed triple sub dials in a micro turned texture, showing 1/10 second counter, minute counter and small seconds all with bright orange hands for quick clarity. The main 60 second chronograph hand sits on top in a stand out brilliant yellow while the hand below contrasts in mirror polished steel against the richly coloured dial. The colour detail continues with curved split line design hour/minute syringe-style hands in mirror polished steel, set to afterglow at night with Grade A Super-LumiNova light yellow infill.

Built around the Farer classic 39mm diameter 316L high grade stainless steel case, at 11mm depth and 20mm lugs. Developed to hold 3 chronograph button pushers set at positions 2, 4 and 10 for split-second timing with the Farer solid bronze tapered crown. The sapphire box case crystal is held by a highly polished rim onto a brushed case, finished with a polished back featuring a Farer engraved turbine design and individually numbered.

FARER.COM

## SPECIFICATIONS

### CASE

39.5mm diameter, 11mm depth, serial numbered

### MATERIAL

Brushed case, polished rim, polished case back

### FINISH

Brushed case and rim, polished case back
