

FARER

BANARTO II

MODEL

GMT QUARTZ

COMPLICATION

RONDA 515.24H

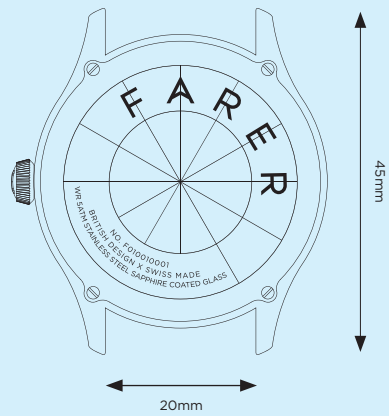

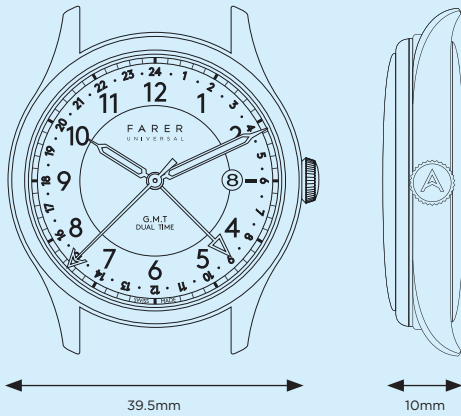

MOVEMENT

A modern colour concept with mid-century styling. The Barnato II GMT is designed for the traveller, featuring dual time and date, driven by a Swiss-Made Ronda 515.24h movement. This upgraded model now features 10 times overprinted numerals against a light silver sunray two tone dial, off-set by the vintage inspired electric blue, coral red and primrose yellow hands. Super Lumi-Nova is applied within the hour and minute syringe-style hands and around the dial at hour index markers.

The brushed 316L stainless steel case design is finished with a highly polished back, engraved with the Farer compass design. Covering the dial is a box domed, sapphire-coated crystal. The signature solid bronze crown embossed with the Farer marque is set into the brushed 316L stainless steel case.
