MODEL

CHRONOGRAPH AUTOMATIC

COMPLICATION

ETA ELABORÉ 2894-2

MOVEMENT

The Cobb Mechanical Chronograph utilises an asymmetrical dial design, brought to life through a distinctive colour combination. Featuring a rich matte, night-sky blue dial with inset sub-dials in split colour tones of aqua. The central chronograph hand in signal yellow sits over highly-polished steel hour/minute stripe hands, gently tapered with pure white Super-LumiNova infill. Hour indexes in highly-polished, raised steel batons tipped in off-white Super-LumiNova and matching date wheel at six o'clock combine to deliver a balanced dial, with focus on the chronograph function. Split second track markings in pure white with 5-second intervals in sky blue, framed by an outer angled flange and orange Tachymeter scale for measuring speed.

The Farer chronograph 316L stainless steel 39mm case is built around the Swiss Made ETA 2894-2 Elaboré modular movement, which allows for a thinner outer case profile of just 12.5mm. The domed sapphire crystal with anti-reflective treatment is held by the outer brushed bezel, highly-polished case edges outline micro-blasted case side cut-ins and follow round to the dropped lugs. A four screw case back with flat sapphire exhibition glass displays the movement and bespoke Farer bronze 'turbine' design rotor. The Farer bronze crown has been retained, but now with a highly functional, straight machined texture and featuring the signature 'A' inset on its profile. Flanked by oblong steel pushers, top brushed and side polished for ease of use - balancing the visual appeal of the overall watch case design.

SPECIFICATIONS

CASE

39mm diameter, 12.5mm depth, lug to lug 45mm, dial aperture 34mm, serial numbered

MATERIAL

316L high grade stainless steel

FINISH

Brushed bezel with polished edge, polished side outline and inner lugs, micro-blasted case side cut-ins

DIAL

Matte night-sky blue dial with highly-polished, raised steel batons outer tipped in off-white Super-LumiNova, white split second markings, orange Tachymeter scale outer dial angled flange, two-sized embossed aqua sectioned sub-dials, matching dial colour date window

HANDS

Highly-polished steel hour/minute tapered stripe hands with pure white Super-LumiNova infill, jet black sub-dial small second hand, signal yellow chronograph central second hand, matching yellow-tipped, coral red 30-minute counter

CROWN

Solid bronze straight crown featuring inset Farer 'A'

PUSHERS

Oblong polished and top brushed 316L stainless steel

GLASS

Anti-reflective domed sapphire crystal, sapphire exhibition glass on rear

STRAP

Over-stitched American Horween leather, 316L stainless steel Farer 'A' buckle fastening

LUG

20mm

WATER RESISTANT

10ATM

MOVEMENT

MOVEMENT

Swiss Made ETA 2894-2 Elaboré chronograph movement, bespoke Farer bronze 'turbine' design rotor

VIBRATIONS

28,800 per hour, 4 Hz

FUNCTIONS

Hours, minutes, small second, chronograph 60 seconds, dragging counter 30 minutes, date display

REGULATOR SYSTEM

ETACHRON and regulator corrector

JEWELS

37

WINDING

Self-winding mechanism with ball bearing

POWER RESERVE

Approximately 42 hours fully wound
