

# FARER

LANSDELL

MODEL

HAND-WOUND MANUAL

COMPLICATION

ETA 7001 'TOP GRADE'

MOVEMENT

The Lansdell is defined by the ring of British racing green, finished in a fine grooved texture seen when the dial catches the light and split by hour/minute baton markers in Super-LumiNova. The detailed design continues across the central dial with a silver steel Guilloché detail emanating from the central point. The outer track is made up of scarlet red minute markers, five minute numerals linking to the very outer powder blue blocks all sat on the spun silver steel main dial.

The inner sub-dial is stepped down of the main dial and continues the silver steel finish. The outer sub-dial markings are combined with the line of scarlet red on the second hand to create a strong contrast to the British racing green. The 37mm collection have all been designed with slim rounded index hands finished in polished silver steel and inset with Super-LumiNova strips on both hour and minute hands.
