COMPLICATION

ETA 2824-2 NON-DATE ELABORÉ

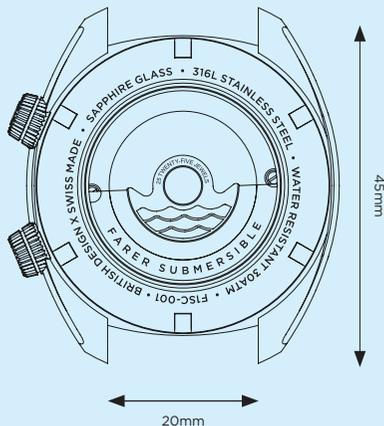

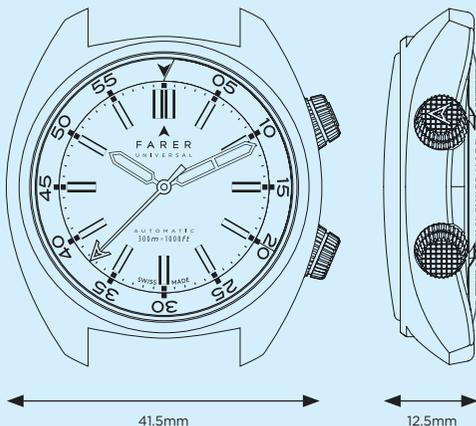

MOVEMENT

The super-smooth silver sunray dial lends a timeless elegance to the Leven. With raised polished track batons around the dial and a clear double baton marker at 12, all infilled with off-white Super-LumiNova, square colour blocks edge the batons and catch the light with a pop of unexpected colour in teal. Characteristic Farer oversized dive hands in contrasting colours accent the dial; black polished steel for the hours and burnt orange for the minutes. Combined with split minute markings infilled with off-white Super-LumiNova, they give greater dive time check clarity against the bezel. The sweep second is finished in black polished steel, highlighted with contrasting teal Super-LumiNova Farer 'A' tip.

The outer unidirectional bezel is finished in silk matte black with overprinted white numerals in five-minute markings and zero arrow, with a 20-minute detailed scale for decompression times highlighted in burnt orange. The Leven combines functional design with bold use of colour to give the watch a practical elegance.

FARER.COM

SPECIFICATIONS

CASE

41.5mm diameter, 12.5mm depth, serial numbered
