MOVEMENT

Combining the best of halcyon styling with a contemporary timepiece, the matte heritage white curved dial + matching date wheel create the foundation for a richly detailed dial. Designed using mid grey outlined English numerals infilled with raised Grade A Super-LumiNova in mint green. Punched through the dial, the recessed triple sub dials in micro turned texture, show 1/10 second counter, minute counter and small seconds all with scarlet red hands for clear readings. The main 60 second chronograph hand sits on top in matching scarlet red while the hand below contrasts in steel blue for stand out. The bold colour combination continues on the curved split line design hour/minute syringe-style hands in rhodium-plated steel blue, infilled with Grade A Super-LumiNova in mint green for afterglow in the dark.

Built around the Farer classic 39mm diameter 316L high grade stainless steel case, at 11mm depth and 20mm lugs. Developed to hold 3 chronograph button pushers set at positions 2, 4 and 10 for split-second timing with the Farer solid bronze tapered crown. The sapphire box case crystal is held by a highly polished rim onto a brushed case, finished with a polished back featuring a Farer engraved turbine design and individually numbered.
