MODEL

CHRONOGRAPH AUTOMATIC

COMPLICATION

ETA ELABORÉ 2894-2

MOVEMENT

The Segrave Mechanical Chronograph is defined by the reverse panda sub-dial design and clear legibility. The matte charcoal black dial with angled inset sub-dials in pearl white - small seconds sub-dial and 30-minute counter detailed in split edge markings for clear reading. The central chronograph hand in fluorescent orange sits over the highly-polished steel hour/minute stripe hands, gently tapered with mint Super-LumiNova infill. Hour indexes in highly-polished, raised steel track batons with inset off-white Super-LumiNova and matching date wheel at six o'clock combine to deliver a balanced dial, with focus on the chronograph function. Second track markings are in pure white, with 5-second intervals in English green framed by an angled dial flange and blue Tachymeter scale for measuring speed.

The Farer chronograph 316L stainless steel 39mm case is built around the Swiss Made ETA 2894-2 Elaboré modular movement, which allows for a thinner outer case profile of just 12.5mm. The domed sapphire crystal with anti-reflective treatment is held by the outer brushed bezel, highly-polished case edges outline micro-blasted case side cut-ins and follow round to the dropped lugs. A four screw case back with flat sapphire exhibition glass displays the movement and bespoke Farer bronze 'turbine' design rotor. The Farer bronze crown has been retained, but now with a highly functional, straight machined texture and featuring the signature 'A' inset on its profile. Flanked by oblong steel pushers, top brushed and side polished for ease of use - balancing the visual appeal of the overall watch case design.

SPECIFICATIONS

CASE

39mm diameter, 12.5mm depth, lug to lug 45mm, dial aperture 34mm, serial numbered

MATERIAL

316L high grade stainless steel

FINISH

Brushed bezel with polished edge, polished side outline and inner lugs, micro-blasted case side cut-ins.

DIAL

Matte charcoal black dial with highly polished raised steel track batons with inset off-white Super-LumiNova, white split second markings, blue Tachymeter scale outer dial angled flange, two equal-sized angle edge embossed pearl white sub-dials, matching dial colour date window

HANDS

Highly polished steel hour/minute tapered stripe hands with mint Super-LumiNova infill, English green sub-dial small second hand, fluorescent orange chronograph central second hand, matching orange-tipped, jet black 30-minute counter

CROWN

Solid bronze straight crown featuring inset Farer 'A'

PUSHERS

Oblong polished and top brushed 316L stainless steel

GLASS

Anti-reflective top domed sapphire crystal, sapphire exhibition glass on rear

STRAP

Over-stitched American Horween leather, 316L stainless steel Farer 'A' buckle fastening

LUG

20mm

WATER RESISTANT

10ATM

MOVEMENT

MOVEMENT

Swiss Made ETA 2894-2 Elaboré chronograph movement, bespoke Farer bronze 'turbine' design rotor

VIBRATIONS

28,800 per hour, 4 Hz

FUNCTIONS

Hours, minutes, small second, chronograph 60 seconds, dragging counter 30 minutes, date display

REGULATOR SYSTEM

ETACHRON and regulator corrector

JEWELS

37

WINDING

Self-winding mechanism with ball bearing

POWER RESERVE

Approximately 42 hours fully wound
