## STANHOPE

MODEL

## HAND-WOUND MANUAL

COMPLICATION

## ETA 7001 'TOP GRADE'

MOVEMENT

The Stanhope is built using a complex multi-layer dial design, with a piquet textured off-white sandwiched central plate punched in for the sub-dial and around the edge at 12 hour markings. The raised polished steel numerals at 12, 3 and 9 and hour batons sit on the textured plate, infilled with midnight blue. The outer baton tips are finished in powder blue for edge contrast. The outer base layer is flooded in midnight blue with a fine stylised minute track in powder blue and scarlet red. Raised wedge markers on the hour indexes are finished in Super-LumiNova raised dots to add a further dimension.

The inner sub-dial base layer continues in midnight blue, shown through the punched textured main plate. White and powder blue outer sub-dial markings are combined with a striking scarlet red second hand that creates a real feature to the watch colour balance. The 37mm collection have all been designed with slim rounded index hands finished in matte silver steel and inset with Super-LumiNova strips on both hour and minute hands.

## SPECIFICATIONS

### CASE

37mm diameter, 8.3mm depth, serial numbered

### MATERIAL

316L high grade stainless steel

### FINISH

Polished case, rim and lugs

### DIAL

Piqué textured off-white sandwiched central plate punched in sub-dial and around the edge at 12 hour markings, raised polished steel numerals at 12, 3 and 9 and hour batons sit on the textured plate, infilled with midnight blue.

### HANDS

Slim rounded index hour/minute hands in polished silver steel, inset with Super-LumiNova strips with sub-dial scarlet red hand

### CROWN

Onion crown in solid stainless steel, machined bronze inset cap featuring embossed Farer 'A'

### GLASS

Double domed anti-reflective sapphire crystal, exhibition glass on rear

### STRAP

Barenia bridle leather, 316L stainless steel buckle fastening

### LUG

20mm

### WATER RESISTANT

5ATM

## MOVEMENT

### MOVEMENT

Swiss Made ETA 7001 'Top Grade' movement

### PRECISION

Three way adjustable with omegamatic timing, average rate of +/-12 seconds/day

### FUNCTIONS

Hours, minutes, sub-dial

### REGULATOR SYSTEM

ETACHRON and regulator corrector

### JEWELS

17

### WINDING

Hand-wound

### POWER RESERVE

Approximately 42 hours fully wound
