

MUSTANG SURVIVAL / THERMAL BASE LAYER

MSL602/603/604/605/606 / THERMAL BASE LAYER

Designed as part of a full thermal management system, these two new base layer options have been constructed for optimal compatibility with Mustang Survival dry suits. Available in both a midweight and lightweight version, each solution will be offered as a two piece set made of the highest quality Polartec® materials to provide utmost flexibility based on mission profile. Top and bottom sold separately.

MSL602/603 / THERMAL BASE LAYER MIDWEIGHT TOP AND BOTTOM

- Made from a combination of Polartec® Power Grid™ and water repellent Polartec® and Wind Pro®
- Designed to be worn with Mustang Survival dry suits and the MSL600 fleece thermal layer
- Thumb holes ease dry suit donning
- Midweight thermal insulation
- Sleeve pocket for small storage
- Water repellent Polartec® Wind Pro® panels prevent wicking and water pick up on wrist, neck, and crotch
- Sleeve pocket for small storage
- Low Profile flat lock seam construction
- Boxer brief style compatible with front dry suit relief zipper
