

WiFi Streaming Instructions For: EH160

Step 1:

Download and install the “**Linkineyes A12 lite**” mobile application.

Step 2:

> Go to settings menu to turn “WiFi” on. There will be a green WiFi icon displayed on the LCD screen.

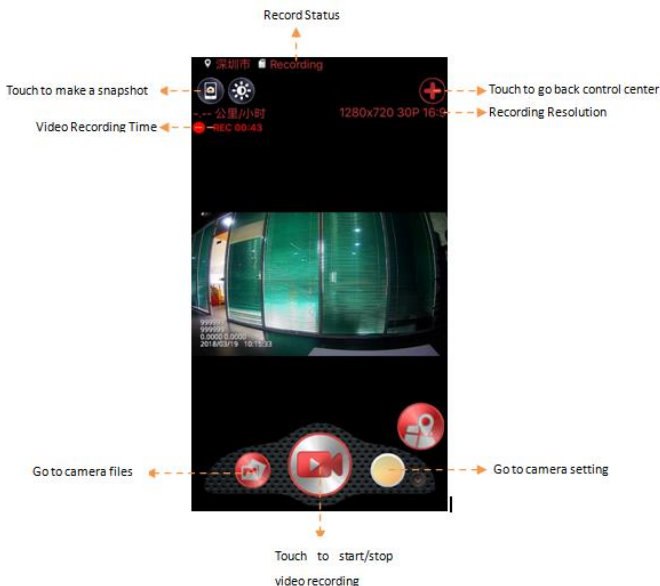

Step 3:

> Go to the WiFi settings of your phone and look for a network (refer to “AP_SSID” for network name “**MyDVR-******”)

> Connect to the network and enter password (default is **1234567890**)

Step 4:

Open the Linkineyes app and wait for the EH160 to start communicating with your phone.

The user can control the camera to start/stop recording and take a snapshot. Camera settings is available to change. Video and snapshot files in the camera can be viewed.

> Touch “+” to go to the app control center.

> Touch “√” to go back.

> When you tap to disconnect the BWC and device, the app's interface will show as below. In this status, the program has reset.
