How to Properly Care for Curly Hair for Kids

BY [VERNA MEACHUM](#) | 4.10.20 | [f](#) [t](#) [p](#)

While I've used some great kid-friendly lines on my children - Moptop kids line and [Kinder Curls](#) line by Curlkeeper - I've also used some of my own personal favorite lines on them: Jessicurl and Bouncecurl. Just as I try to keep my own regimen quite simple, I also keep their lineup simple. I typically do not layer products, usually just a moisturizing leave-in or cream followed by a gel to seal in the moisture and hold the curls. Our go-to combo is [Bouncecurl Clump and Define Cream](#), followed by [Kinky Curly Curling Custard](#).

Do you prefer to share products or use a "kids line" on the kids?

I don't mind sharing maybe a leave-in or cream that can work for us both, but I am very cautious of the ingredients it may contain. For example, [Honey Baby naturals leave-in](#) has worked great for us as it's a family-friendly hair care line, as well as [Bounce Curl Clump & Define Cream](#), (making sure to use a very small amount on her hair because it is quite potent.)
