

BRUSH HOUR

Say hello to your best base ever with the Real Techniques Core Collection

THE DETAILER BRUSH

Precision cut to get into those tricky areas such as the inner corners and under the eyes, it makes applying concealer a cinch and can even do double-duty as a lip brush, providing great definition. Just make sure you push the brush into the skin rather than drag it for better coverage.

THE BUFFING BRUSH

Ideal for full-coverage application of powder and mineral foundation, as well as blush, bronzer and highlighter.

It also works well with cream-to-powder products, allowing you to really work them into the skin.

THE CONTOUR BRUSH

The Kardashians will have nothing on your contouring skills with this brush. Use with your favourite highlighter to bring a youthful glow to your cheeks, then apply bronzer into the contours to help shape your face.

THE POINTED FOUNDATION BRUSH

Perfect for liquid foundations, this brush helps you build up a custom coverage. It's great for getting around the nose and eyes, and can be used to apply concealer, too.

WHAT'S THE SECRET to a fresh, flawless complexion? The perfect base of course – and it all starts with the right brushes. Created by international makeup artists Samantha and Nicola Chapman (and considered a must-have in their kits), the Real Techniques Core Collection has everything you need to create a glowing, high-definition canvas from start to finish. The multi-tasking brushes make it easy to evenly apply foundation, concealer, blush and bronzer, and even contouring is a breeze. Plus, the super-soft synthetic bristles mean the brushes can work with both cream and powder formulations. Priced at under \$50, it proves you don't need to spend a fortune to look a million bucks.

BARGAIN BUY

The Real Techniques Core Collection has all bases covered – and for just \$47.50!
