Model C Kit Assembly Instructions

VIN: _____

Builder: _____ Build Date: _____

Register your VIN after vehicle is completed.

Email info from Title and Registration card to: VIN@constructatruckusa.com

All designs, documents and processes © 2014 SHELFactory LLC and Construct A Truck USA

Things you will need to build this kit:

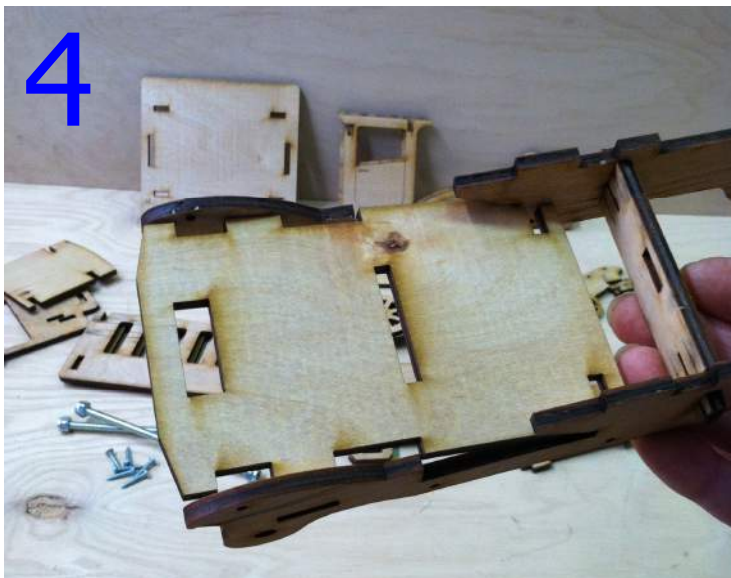

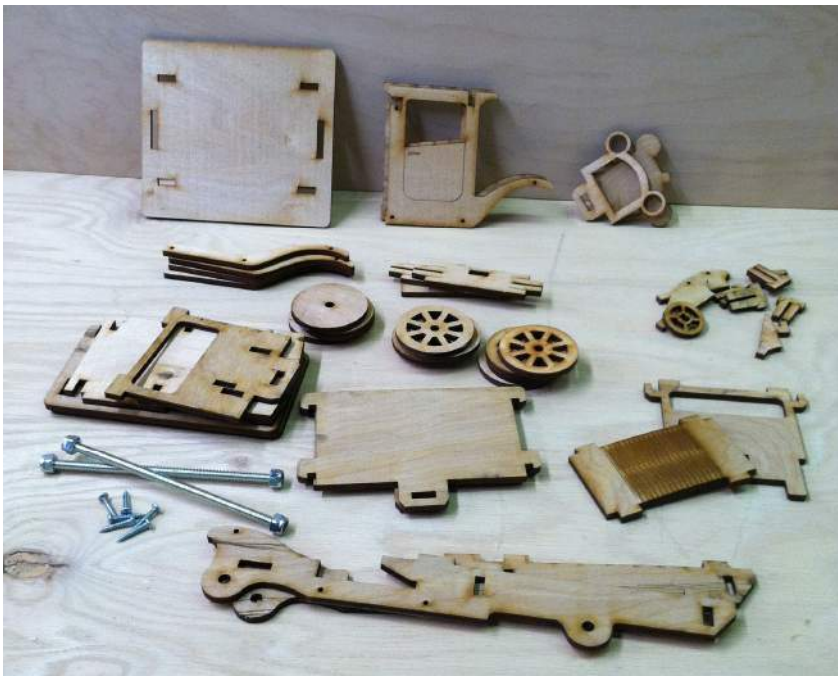

1. Phillips head screwdriver
2. Pliers to hold the threaded axle rod
3. Wrench (7/16" or adjustable) to tighten axle nuts
4. Sandpaper to smooth or remove any burrs or splinters.

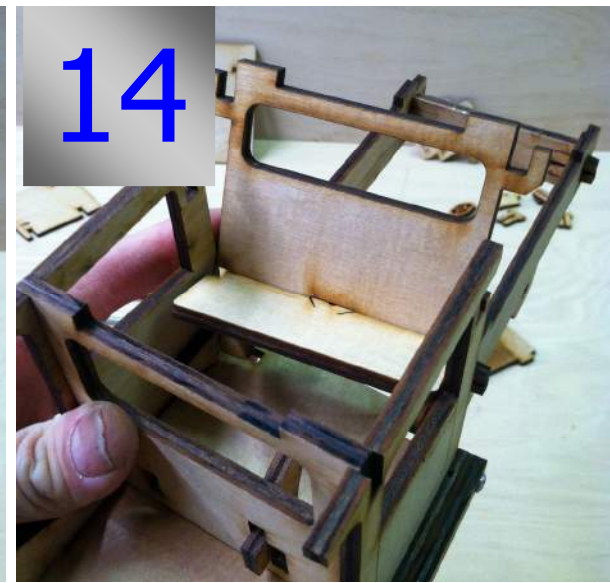

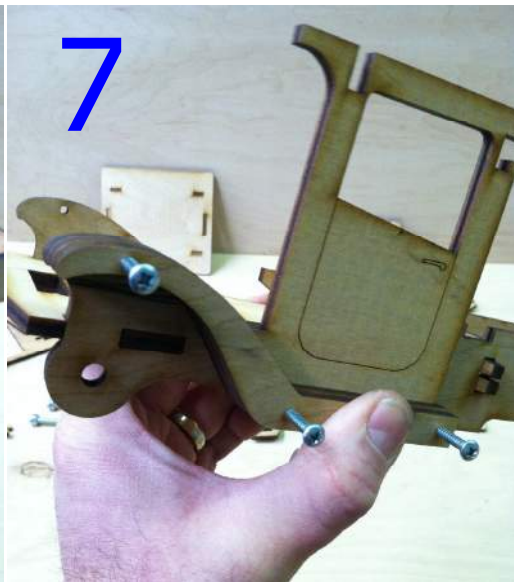

This kit is unpainted.

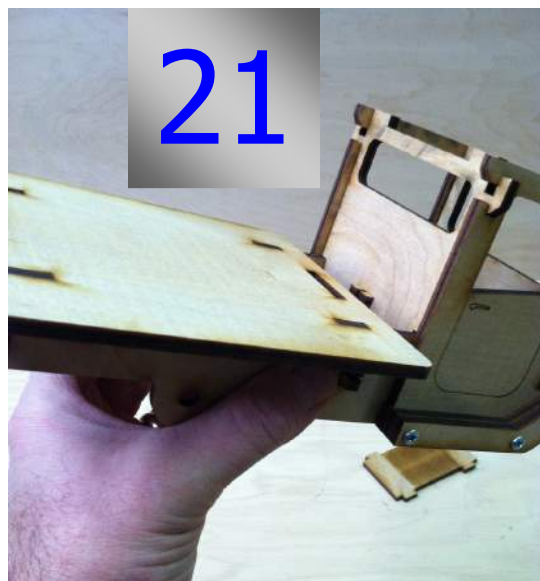

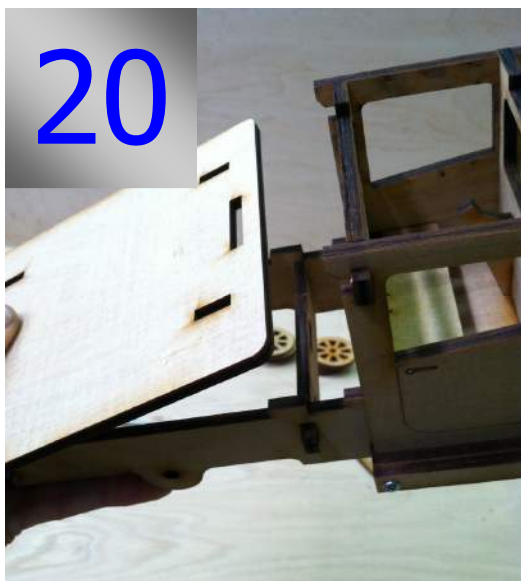

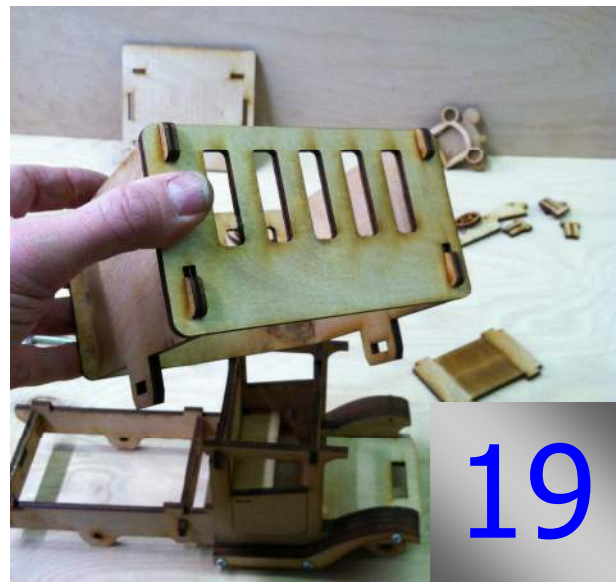

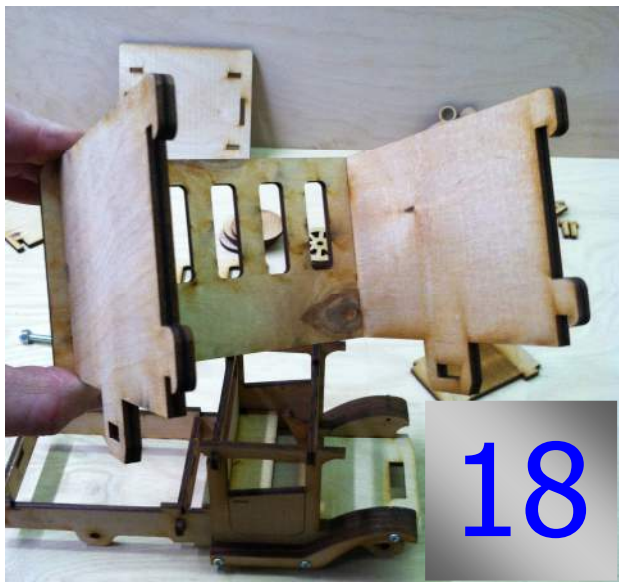

We suggest you paint a few of the parts before assembly. Please note that a layer of paint can cause interference in the slotted joints. If this happens, simply sand the affected slot and/or tab.

TruckMaker's Pledge

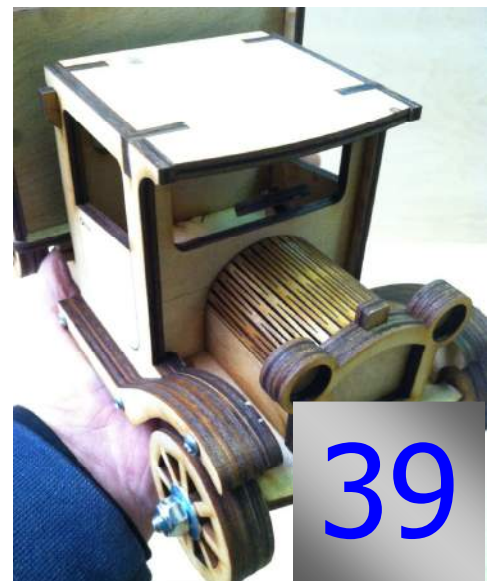

*I pledge allegiance to my
Manufacturing talents,
And to the
Construct A Truck USA company
That stands for the inherent
Satisfaction and benefit
Of making something
With my own hands.
To honor the skills,
Talents, and abilities
Of all engineers,
Who invent, design, or
Manufacture
So many valuable, necessary or
Desirable products that help
Make our economy strong
And our Nation great.*
