

KORBER MODELS

STEAM ROUNDHOUSE NO. 320 AND 320A KITS

FRAMING TEMPLATE "A"

You will need 4 frames for the 320 kit and 1 for 320A kit

CUT OFF AT RED POINTS

STEAM ROUNDHOUSE NO. 320 AND 320A KITS

FRAMING TEMPLATE "B"

CUT OFF AT RED POINTS

1. Align the 2 templates by cutting along template "B" left edge so you can match up the colored edges better. Also use a tape measure to make sure the length is 23 5/8" and square.
2. Cover templates with wax paper or contact paper once taped together. This is now your glueing jig for frames.
3. I recommend attaching this template to a piece of wood so you can add wood at bottom for square legs. Also add nails or small blocks of wood to hold the wood in place while glue dries.
4. You will need 4 frames for the 320 kit or just 1 for 320a.
5. The wood does not come the exact size, you will need to cut it down. The measurements are accurate.
