Designed for comfortable use with prescription glasses.

One size fits all.

SKU CAD# CROCXFCSHLD

SKU USD# ROCXFCSHLD

Multi-purpose Use

product details

REUSABLE: The visor can be easily cleaned with soap and water, but wiped with alcohol for disinfecting is recommended.

ANTI-FOG: Clear material, made with super transparent PVC (polyvinyl chloride) provides maximum visibility and prevents fog from covering your sight. Durable and practical.

SMART DESIGN: The raised design on the nasal bridge holds the shield away from the face, allowing room for additional prescription glasses for those who need them. The frames are ultra light for lengthy wear to avoid stress on the bridge of nose and top/ behind the ears.

COMPREHENSIVE PROTECTION: Wrap-around face shield provides maximum coverage from area above top of the eyebrow to below the chin. On children the shield covers from forehead to the top of their chest. The shield is angled so that it does not rub against neck or chest, no matter which direction one is looking.

The shield protects your eyes, nose and mouth from saliva, droplets, sprays, splatters, ultraviolet rays, wind, pollen, aerosols, and flying debris. The shield promotes keeping hands from touching face.

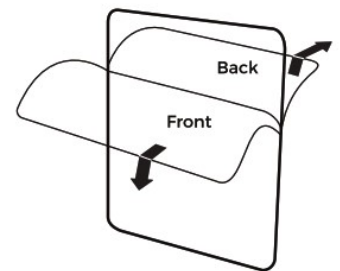

ONE SIZE FITS ALL.

Color: Clear and Blue

sizing chart

After attaching shield to glasses, please peel off the front and back Protective Films prior to use.
