A MASTERY OF LEGACY AND LEADING-EDGE DATA FORMATS

The world today runs on data! From legacy serial communications to modern TCP/IP communications, data networks are widely used in automation, control, and communication systems that perform many important tasks ranging from production, communications, security, surveillance, to research. Modern data networks often face the challenge of merging legacy data formats and protocols with more technologically advanced formats. In addition, interference can seep into the communication lines from many sources, such as ground loops, spikes, transient surges, and remote lightning. All these sources threaten your valuable and mission-critical equipment and your production time, which is probably the most important factor to consider when choosing data communication products and suppliers.

For the past decade, CommFront has built a reputation as a major supplier of rugged and reliable, yet simple, data communication products and solutions.

Our versatile products make converting between many data formats – including the legacy RS-232, RS-485, RS-422, and TTL; and the leading-edge USB, Ethernet, and TCP/IP - smooth, simple, and reliable. Our line of rugged, industrial-grade, SGS/TUV-certified converters undergo rigorous testing so that you can enjoy reliable interfacing. These rugged converters withstand the harshest operating environments and come bundled with optional optical isolators and built-in selectable end-of-line terminators, allowing for interfacing between commercial and industrial equipment (computers, PLC, RTU, SCADA, and HMI, etc.) without interference from noise, reflections, ground loops, and transient surges. Our range of converters - standard or optically isolated, port or externally powered, copper-wire or optical-fiber - ranks among the widest in the market. If you have a data format, we have the perfect device for it.
Rated to perform at temperatures between -40°F and 185°F (-40°C and 85°C), our rugged industrial-grade RS-232/RS-485/RS-422/TTL converters are almost indestructible. These converters support multi-drop RS-485/RS-422 networks and come with 600W surge protection, 15KV ESD protection, selectable end-of-line terminators, and optional 2500V opto-isolation circuitry, which ensure crisp data signals without interference for all types of installations.

### RS-485 to RS-422

**Model: RPT-485_422-2**
Description: Industrial RS-485/RS-422 Converter/Repeater

**Key Features:**
- Converts 2-wire RS-485 to 4-wire RS-422/RS-485
- Extends RS-485/RS-422’s distance to up to 4000ft
- External 5VDC powered (power adapter included)
- Rugged industrial grade
- Operating Temperature: -40°F to 185°F
- Built-in 600W surge protection
- Built-in 15KV ESD protection
- Selectable 120-Ohm end-of-line terminator
- Operates reliably from 300 to 115.2K baud

---

### Standard

**Model: CVT-485-1**
Description: Industrial Port-powered RS-232/RS-485 Converter

**Key Features:**
- Converts RS-232 to 2-wire RS-485
- Port powered
- Rugged industrial grade
- Supports up to 128 units of RS-485 devices
- Data direction auto-turnaround
- Operating Temperature: -40°F to 185°F
- Built-in 600W surge protection
- Built-in 15KV ESD protection
- Selectable 120-Ohm end-of-line terminator
- Operates reliably from 300 to 115.2K baud

**Model: CVT-422-1**
Description: Industrial Port-powered RS-232/RS-422 converter

**Key Features:**
- Converts RS-232 to 4-wire RS-422/RS-485
- Port powered
- Rugged industrial grade
- Supports up to 128 units of RS-422 devices
- Operating Temperature: -40°F to 185°F
- Built-in 600W surge protection
- Built-in 15KV ESD protection
- Selectable 120-Ohm end-of-line terminator
- Operates reliably from 300 to 115.2K baud

**Model: CVT-485_422-4**
Description: Industrial High-speed Opto-Isolated RS-232 to RS-485/RS-422 Converter

**Key Features:**
- Converts RS-232 to RS-485/RS-422
- Externally powered, no port power required
- 2500V opto-isolation
- Rugged industrial grade
- Supports up to 128 units of RS-485/RS-422 devices
- Operating Temperature: -40°F to 185°F
- Built-in 600W surge protection
- Built-in 15KV ESD protection
- Selectable 120-Ohm end-of-line terminator
- Direct DIN-rail (rack) or wall/panel mounting
- Supports wide range of DC inputs (9 to 30VDC)
- Operates reliably from 300 to 115.2K baud

**Model: RPT-485_422-4**
Description: Industrial RS-485/RS-422 Isolator/Repeater/Converter

**Key Features:**
- Isolates one group of RS-485/RS-422 devices from another
- Extends RS-485/RS-422’s distance to up to 4000ft
- Converts 2-wire RS-485 to 4-wire RS-422/RS-485
- Rugged industrial grade
- 2500V opto-isolation
- Operating Temperature: -40°F to 185°F
- Built-in 600W surge protection
- Built-in 15KV ESD protection
- Direct DIN-rail (rack) or wall/panel mounting
- Supports wide range of DC inputs (9 to 30VDC)
- Operates reliably from 300 to 115.2K baud
THE PRODUCTS

Rugged industrial grade.
Built for harsh environments and interfacing with mission-critical equipment.
Options of port or externally powered, standard or optically isolated.
Built-in selectable end-of-line terminators to reduce noise and reflections.

With our high-quality, high-performance USB converters that use only top-quality chipsets such as those from FTDI and Silicon Labs, USB signals are converted seamlessly into RS-232, RS-485, RS-422, TTL, and Ethernet signals. You can confidently choose from our menu of industrial and commercial-grade devices, while knowing that you will get nothing but the best from CommFront.

**USB to TTL**

Model: **USB-232-1+TTL-232-1**
Description: USB to TTL Adapter

**Key Features:**
- Converts USB to TTL signals
- USB port-powered
- FTDI chipset
- Supports all major Windows, Mac, and Linux platforms
- Plug and play (hot-pluggable)
- Operates reliably from 300 to 115.2K baud

**USB to Ethernet**

Model: **USB30-ETH-1**
Description: USB 3.0 to Gigabit Ethernet Adapter

**Key Features:**
- Converts USB 3.0 to Gigabit Ethernet
- Backward compatible with USB 1.1 and USB 2.0
- Supports USB Super/High/Full/Low speed modes with bus power
- Complies with the Energy-Efficient Ethernet standard (IEEE 802.3az)
- Complies with IEEE 802.3, 802.3u, and 802.3ab standards
- Supports all major Windows, Mac, and Linux platforms
- Plug and play (hot-pluggable)
- Operates reliably from 0 to 1G baud
Model: USB-232-1  
Description: USB to single RS-232 Adapter  
**Key Features:**  
- Converts USB to RS-232  
- USB port-powered  
- FTDI chipset  
- Supports all major Windows, Mac, and Linux platforms  
- Plug and play (hot-pluggable)  
- Operates reliably from 300 to 115.2K baud

Model: USB-485-1  
Description: USB to RS-485 Adapter  
**Key Features:**  
- Converts USB to 2-wire RS-485  
- USB port-powered  
- FTDI chipset  
- Supports one loop of up to 256 units of RS-485 devices  
- Auto-turnaround for RS-485 communications  
- Built-in selectable 120-Ohm terminator  
- Supports all major Windows, Mac, and Linux platforms  
- Plug and play (hot-pluggable)  
- Operates reliably from 300 to 115.2K baud

Model: USB-422-1  
Description: USB to RS-422 Adapter  
**Key Features:**  
- Converts USB to 4-wire RS-422/RS-485  
- USB port-powered  
- FTDI chipset  
- Supports one loop of up to 256 units of RS-422 devices  
- Auto-turnaround for RS-485 communications  
- Built-in selectable 120-Ohm terminator  
- Supports all major Windows, Mac, and Linux platforms  
- Plug and play (hot-pluggable)  
- Operates reliably from 300 to 115.2K baud

Model: USB-Serial-3  
Description: Industrial Port-powered Isolated USB to RS-232/RS-485/RS-422 Converter  
**Key Features:**  
- Converts USB to RS-232/RS-485/RS-422  
- 2500V opto-isolation  
- USB port-powered, no external power supply required  
- Rugged industrial grade  
- Silicon Labs chipset  
- Built-in selectable 120-Ohm terminators for RS-485/RS-422  
- Supports all major Windows, Mac, and Linux platforms  
- Plug and play (hot-pluggable)  
- Operating Temperature: -40°F to 185°F  
- Direct DIN-rail (rack) or wall/panel mounting  
- Operates reliably from 300 to 115.2K baud
THE PRODUCTS

KEY FEATURES

- Industrial or commercial grade.
- Convert USB signals into RS-232, RS-485, RS-422, TTL, and Ethernet signals, and vice versa.
- High-quality chipsets from FTDI and/or Silicon Labs.
- Support all major Windows, Linux and Mac platforms.
- Plug and play (hot-pluggable).
- Options of port or externally powered, standard or optically isolated

Our fiber optic converters run on a light-speed fiber backbone that is inherently resistant to radio and electrical interference, such as EMI/RFI, lightning, transient surges, and ground loops. These converters extend serial (RS-232/RS-485/RS-422/TTL) and Ethernet signals with many options - single-mode and multi-mode; ST, SC, and FC connectors; point-to-point and advanced daisy-chain/self-healing redundant-ring fiber networks – giving your data networks unparalleled flexibility, reliability, and transmission range.

Serial to Fiber Optic (point-to-point)

**Model: FBR-Serial-2**
Description: Industrial RS-232/RS-485/RS-422 to Fiber Optic Converter

**Key Features:**
- Rugged industrial-grade
- Transmits serial data (RS-232, RS-485, or RS-422) over long distances through point-to-point fiber links
- Single-mode: 25 miles (40 km);
  Multi-mode: 3 miles (5 km)
- Standards can be mixed and matched (same data type; one side RS-232 and the other side RS-485 or RS-422; one side RS-485 and the other side RS-422; etc.)
- Supports up to 128 nodes of RS-485/RS-422 devices
- ST, SC, or FC connectors
- Supports a wide range of fiber optic cables
- No software drivers, DIP switch or jumper settings required
- Operating Temperature: -40°F to 185°F
- Built-in 600W surge protection
- Built-in 15KV ESD protection
- Supports wide range of DC inputs (9 to 30VDC)
- Direct DIN-rail (rack) or wall/panel mounting
- Operates reliably from 300 to 115.2K baud

Serial to Fiber Optic (multi-drop)

**Model: FBR(M)-Serial-2**
Description: Industrial RS-232/RS-485/RS-422 to Multi-Drop Fiber Optic Converter

**Key Features:**
- Rugged industrial-grade
- Extends serial data (RS-232, RS-485, or RS-422) uninterruptedly over extremely large areas through multi-drop fiber optic links
- Daisy-chain or self-healing redundant-ring fiber network configurations
- Single-mode: 25 miles (40km) per fiber node;
  Multi-mode: 3 miles (5km) per fiber node
- Standards can be mixed and matched
- Supports a wide range of fiber optic cables
- Supports up to 255 fiber nodes
- Supports up to 128 nodes of RS-485/RS-422 devices per fiber node
- ST, SC, or FC connectors
- Full redundant power supply and fiber network
- Power loss alarm relay output
- Operating Temperature: -40°F to 185°F
- Built-in 600W surge protection
- Built-in 15KV ESD protection
- Supports wide range of DC inputs (9 to 30VDC)
- Direct DIN-rail (rack) or wall/panel mounting
- Operates reliably from 0 to 100M baud

Ethernet to Fiber Optic

**Model: FBR-Ethernet-2**
Description: Industrial 10/100M Ethernet to Fiber Optic Converter

**Key Features:**
- Rugged industrial-grade
- Transmits 10/100M Ethernet data over long distances through point-to-point fiber links
- Single-mode: 12.4 miles (20 km);
  Multi-mode: 3 miles (5 km)
- Auto-negotiation of speed and duplex mode
- Auto-MDIX
- Store-and-forward mechanism
- ST, SC, or FC connectors
- Supports a wide range of fiber optic cables
- No software drivers, DIP switch or jumper settings required
- Operating Temperature: -40°F to 185°F
- Built-in 600W surge protection
- Built-in 15KV ESD protection
- Supports wide range of DC inputs (9 to 30VDC)
- Direct DIN-rail (rack) or wall/panel mounting
- Operates reliably from 0 to 100M baud
THE PRODUCTS

FBR-Serial-2  FBR(M)-Serial-2  FBR-Ethernet-2

Industrial Communication Solutions
RUGGED. SIMPLE. RELIABLE.

For the past decade, CommFront has built a reputation as a major supplier of rugged and reliable, yet simple, data communication products and solutions. From factories to energy plants, shipyards to transportation terminals, and server rooms to laboratories, CommFront provides complete solutions for data and device connectivity, conversion, protection, extension, and research. CommFront offers the broadest selection of rugged, simple, and reliable data communication and machine-to-machine (M2M) connectivity products, ranging from legacy serial communications to modern TCP/IP communications, copper wire to optical fiber, and D-sub to USB connectivity.

CommFront products have been proven to be reliable and are widely used in critical areas that require safe, reliable, and uninterrupted operation, including:

- Factory Automation
- Building Automation
- Energy Plants
- Shipyards and Marine
- Transportation
- Industrial and Commercial Buildings
- PoS, ATMs, and Banks
- PLC, RTU, HMI, and SCADA Systems
- Security and Surveillance
- Instrumentation
- IT Networks
- Laboratories

Pushing our products to the limit, so you don’t have to

Data networks are widely used in automation, control, and communication systems that perform many important tasks ranging from production, automation, communications, security, surveillance, to research. Data networks are mission-critical, and even the shortest downtime or delay can be very costly; furthermore, data networks consist of many different components and are often used over long distances in an electrically noisy environment. Engineering, testing, and troubleshooting can be very time-consuming and challenging. At CommFront, we push our products to their limit over a 3-to-6-month assessment and certifying process, complete with functionality, reliability, and EMC/EMI tests. We test radiation, emissions, and immunity to guarantee the safety of our human users and compatibility with their devices. The industry has many certifying agencies, ranging from the reputable to the less reputable, and from 3 months to 3 days of certification time. CommFront chooses to partner with SGS and TUV because they have the strictest rules and regulations for product testing and certifications. Both SGS and TUV are the Nationally Recognized Testing Laboratories [NRTLs] in North America (approved by the Occupational Safety & Health Administration [OSHA]) and the Notified Bodies in the European Union, the most meticulous and recognized certifying labs in the industry. This makes our products worry- and hassle-free for safety, compatibility, and interfacing with mission-critical equipment.

A reliable data network starts with choosing the right solutions and partners. CommFront engineers have the rich field experience and in-depth knowledge to understand your problems, how to solve them, and most importantly, how to prevent them – right from the design stage. We design and engineer our products not just on the product level but also from the system perspective, for we believe that data communication products do not function by themselves; rather, they are part of a system. Any supplier can sell you a product, but only CommFront is equipped with the rich field experience, world-class certifications, proven track record, and strict ISO quality management system to ensure your total satisfaction.
THE KEYS TO OUR EXCELLENCE

- Industrial Ruggedness
- Certification by World-Class Labs
- Designed & Manufactured to ISO Standards
- Lead-Free RoHS Compliance
- Applied Reliability Engineering
- Proven Track Record
- 5-Year Replacement Warranty
- 30-Day Money-Back Guarantee
- Free Worldwide Shipping
- Intensive and Fast Support

SAFETY ASSURANCE

CommFront products are strictly certified by SGS/TUV – the world’s leading inspection, testing, and certification companies.

QUALITY ASSURANCE

CommFront products are designed and manufactured to ISO 9001 standards. Our quality control system is strictly certified by SGS (Cert No. SG12/04213).

WARRANTY & GUARANTEE

CommFront products have been proven to be reliable. We back our high-quality products with a 5-year replacement warranty and a 30-day risk-free money-back guarantee.

OUR CLIENTS

Throughout the years, CommFront has gained a sterling reputation in the industry, and its clients include many industry leaders. Below are some of our satisfied customers from around the world, just to name a few:

- ABB
- Advanced Control Systems
- Allied Electronics
- Applied Materials
