

FLEXXICORE CHALLENGER TRIAL ANNOUNCEMENT

Following the 2015 launch of the FlexxiCore Challenger, a cross-section of 41 middle-aged to elderly users undertook a 60-day trial, keeping a log of their progress. Of the 41 participants, 23 were practitioners in the medical, healthcare and fitness sectors. A Summary of the Trial Results is available at FlexxiCore.com.

The trial logs included a question about desired outcomes, and Before & After measurements were recorded. Beyond the measurable outcomes, the participants' logs revealed a remarkable diversity of improvements. As well as the Weight Loss, Reduction in Waist, Hip and Thigh Measurements, and a range of mental and emotional benefits observed, 15 specific themes covering physical improvements emerged from the participants' logs and observations, as summarised here.

We are now gathering the observations of another group of trial volunteers. To this end, we are offering the opportunity to up to 50 adults to undertake a no-obligation 60-day trial of the FlexxiCore Challenger. We are offering a 50% discount to those willing to keep a log of their regular use ("at least 3 times a week") over 60 days.

Alternatively a 10% discount PLUS a 15% cashback payable after 60 days is offered to those providing a written summary describing their experience. In both cases our standard 60-day Money Back Guarantee applies.
