

Javelin™

Tub and Sink Treatment

attacks clogs to restore drain lines to full-flow capacity.

FAQs

1. Can I use Javelin™ Tub and Sink Treatment to clear hair and grease clogs from kitchen drains, garbage disposals, mop sinks, laundry tubs, bath tubs or bathroom sink drains?

Yes. Javelin™ Tub and Sink Treatment is designed to emulsify organic blockages in p-traps and drain lines such as hair, grease, food particles and scraps.

2. Can I use Javelin™ Tub and Sink Treatment to clear calcium blockages in urinals?

No. We would recommend Javelin™ Urinal Treatment for this application.

3. How long does it take for Javelin™ Tub and Sink Treatment to work?

For a slow running drain, let stand for 45 minutes to 1 hour. If you don't need to flush the drain, then don't, so that the chemical will continue to work. If it's clogged, let stand until the drain is un-clogged. This could take 8-10 hours.

4. Can I use Javelin™ Tub and Sink Treatment to clean horizontal or vertical surfaces like vanity tops, kitchen counters, tiled odors or walls with heavy lime and scale build up?

No. This product is only designed to emulsify organic materials such as hair, grease, food particles and scraps.

5. Is Javelin™ Tub and Sink Treatment safe to use on all pipes?

Yes. Javelin™ Tub and Sink Treatment is safe to use on ABS, PVC and cast iron piping. The product will not smoke, or emit foul odors. It will not stain the chrome or steel sink drain or pop up.

6. Can I use Javelin™ Tub and Sink Treatment to clear foreign objects out of drains, or tree roots that are blocking drains?

No. Javelin™ Tub and Sink Treatment will only dissolve organic materials such as hair, grease, food particles and scraps.

7. Is Javelin™ Tub and Sink Treatment septic safe?

Yes. Javelin™ Tub and Sink Treatment will not harm the bacteria in septic tanks when used as directed.
