Issue 124

UK & EIRE 2 Guineas (£2.10) USA \$5.00

The Northern Ireland Fire Authority was formed in 1950 with the amalgamation of the Northern fire authority in Ballymena, the Western authority in Londonderry and the Southern authority in Portadown.

The three authorities had been formed in 1947 after the N.F.S (N.I.) had been stood down. The first commander appointed was George Murphy, previously the Fire Service Inspector for the Ministry of Home Affairs.

As the Fire Authority had also undertaken the task of recruiting and training the newly formed Auxiliary Fire Service arm of the Civil Defence, their premises were now too small for administration and training purposes.. They had originally occupied their headquarters at

"Arberdour" Clonevin Park in Lisburn. They purchased more extensive premises from the Lisburn Borough Council. When George Murphy retired in 1972, the Authority appointed George Morrison as Fire Force Commander. He held this office until the Northern Ireland Fire Authority amalgamated with the Belfast Fire Brigade in 1973. Our 1:76 Bedford TK is shown in the liveries of the Northern Ireland Fire Authority and is priced at £8.95

TK FIRE ENGINE - NORTHERN IRELAND FIRE BRIGADE		

Manufactured between 1957 and 1960 and designed by Jensen's designer Eric Neale, only 193 were made - a fact that added to its exclusivity. Its distinctive and attractive shape, glass fibre body and top speed capability of 125 mph earned it rave reviews by the motoring press, which classed the 541R as the fastest four-seater coupe of the time.

PLATINUM GLOBE

This month we have a Platinum Globe - so we have increased the number of pages as requested by many of you in our recent survey. All details regarding the multi -purchasing can be found on the price list enclosed.

UPDATE FROM TAFF

A slightly different format of the Globe (this month only) as we try and show more vehicles for the increasing numbers of new members, also the Platinum members for multi-purchasing. A chance to update you on a number of issues

New tooling is progressing, with a lot to release over the next six months. The factory is again at its peak capacity, we are still suffering with the need to rerun past releases to satisfy demand and these in the short term will take priority. I have no plans to request a capacity increase, particularly as we like many others are suffering with labour shortages - a problem that will be with all factories over the coming years. Generally there are many items just awaiting production slots. The 1:43rd cars are proceeding apace and we have a queue of new items to go down the assembly line. We are planning production of the new Low Loader and Cresta at the end of April/Early May. The Sunbeam Talbot is slightly delayed and will appear closer to our next new model that we will announce in the next Globe. All of the new N scale cars, Land Rovers, low loader taxis, Scarabs etc are all ready to run. They again are just awaiting a production slot. The new Trolleybus and RF bus are slightly behind and we will now release in Quarter 3 of this year. The 1:76 models are all progressing, the new AEC Fire Engine, is delayed as we are adding a separate ladder which will be added to the pack.

I am interested in feedback on how to handle production samples etc. The issue is a growing one, as we accumulate items at an alarming rate. The problem is that during product development we have numerous samples, in the early days of a product, it may be partially assembled castings progressing through to painted/printed samples etc. Some of these may differ to the final production specification. It may sound an easy problem to resolve, for years I have donated odd items to charity etc - they often fetch premium amounts at auctions. We don't have the administration to try and sell them individually, neither do we want to be explaining what the items are in detail. I have asked a few people for ideas, but I will throw it open to the members for suggestions. Some have suggested we just offer a selection with a 'blind bid' each month, other say sell them on the internet. I quite like the idea of the blind bid with possibly a donation to a charity each year - all suggestions are very welcome.

**MORRIS MINOR CONVERTIBLE
OLD ENGLISH WHITE/RED**

AR54 ARMSTRONG
SIDDELEY £5.95

enter motor car manufacturing and the easiest way to do this was taking over an existing business - they chose Wilson-Picher. The whole story is covered in this fascinating book.

Another release in the Auto review series, this time Armstrong Siddeley. Possibly a hint here on what our next release will be in the 1:43rd automobile range! Armstrong Whitworth were involved in shipbuilding at the turn of the 20th century and built dozens of warships for many navies. Like other concerns, of the time, they wanted to

**76FX4005 FX4 TAXI
THE SOUND OF MUSIC - £3.49**

Beg, steal or borrow a ticket was the catch phrase. We didn't - we used our mothers' pension, as we went to see the film in Cardiff (by train !). Cost a fortune and we didn't have meat on a Sunday for at least a month. The FX4 taxi is carrying the advertising of the time. TAFF

**76JM007 - MORRIS J2 MINIBUS
BRITISH RAILWAYS - £3.95**

A British Railways J2 minibus. The J2 is one of my favourites, particularly the Morris with that 'ugly' front. It's what gives it such character, a very popular vehicle in the 1960's. The van version of the J2 carries the Austin front - just to confuse things, towards the end of production the Austin front had Morris badges.+ TAFF

**76WE009 -W & E MILK FLOAT - £3.49
SCOTTISH DAIRY FARMERS Co LTD**

Another Milk Float, this time in Scottish Dairy Farmers colours. Look out for the different tooling options that we have on other liveries. Fully open (as shown here), half and fully closed. First seen in the early 1950's the Wales & Edwards was still delivering milk into the early 1970's. Ahead of their time electric floats became redundant - how things change! TAFF

**76JAG2006 - MKII JAGUAR
OPALESCENT GOLDEN SAND £3.49**

The Series II Jaguar in this lovely golden colour. I recently had the pleasure of travelling in one of these at an outdoor event. Strange how it turned the heads of so many. The 75th anniversary of Jaguar will soon be upon us, I wonder if the new owners will be celebrating ! TAFF

**76RAB007 - SCARAB FLATBED TRAILER
POST OFFICE SUPPLIES DEPT - £6.95**

A Post Office Supplies Scarab. Until recently we could ring the Post Office for bags, crates, 'yokes' etc. Things have certainly changed. We started

delivering product to a customer in France a few years back, who would then feed the items into the UK postal system, to be delivered by the Royal Mail as it was cheaper this way. Can you believe in a system that creates such nonsense !TAFF

Rail Era:2000 - 2010

For many years, London Transport used chassis from both AEC and Leyland. It was seen as what we would now call 'politically correct' for London to be using Leyland as well as AEC products, especially in the important export market. Therefore, when the post-war standard bus for London was proposed, a Leyland powered version was essential. If it could be made to fit the same bodies as the AEC vehicle, even better! And so the RTL was born. To the eye, they looked identical to the RTs except for modifications that included a Leyland radiator, slightly different front chassis and foot of the cab front.

MECHANICAL HORSE FLATBED TRAILER PICKFORDS		

Pickfords was founded in the 17th century as a road construction haulier, moving rocks for the repair of turnpikes and other roads. In the 19th century, it operated wagons on other companies railways, but this was contentious, and eventually this service was eliminated. In the 20th century it entered the freight industry using motorised trucks. The company was taken over by the railways in 1934, and nationalised in 1947.

A further tooling addition to the N gauge range - a rigid flatbed in the very popular British Rail livery. We will soon have the Scarab in N scale, along with a few other variants. There are also quite a few cars and commercials coming including the very popular Land Rover. To give variety these will come as open, closed and canvas variants. The Dennis F12 is also on the way, so plenty to look forward to in this ever expanding range.
