

## Wall Ball Limited Warranty

Our Wall Balls are constructed to a very high standard and are weight balanced using the best possible materials for commercial use. The wall balls have a manufacturing warranty for the structural integrity of the ball if it is used on a non-abrasive surface and has not been slammed. This warranty covers the item for a period of 6 months from date of purchase. If a problem arises during the stipulated period, a digital image is required for Gym Concepts to process the claim accordingly and offer a replacement on the faulty item. Please note: Shipping costs will be at the customer's own expense and any misuse will not be warranted, as this is not deemed a manufacturing fault.

Our Wall Balls are not designed to be used on any abrasive surfaces. Use on abrasive surfaces will wear the vinyl on the seams and cause the ball to fail. We recommend that wall balls be used in conjunction with our Wall Ball Targets, or on a wall surface that has been painted to give it a smooth non-abrasive finish. Use on abrasive surfaces or slamming of the balls will void the warranty.

## Bumper Plate Limited Warranty

Bumper plates are manufactured to the highest quality standard and are suitable for commercial use in a CrossFit gym. They have been tested to withstand 30,000 drops from overhead. Manufactured from synthetic rubber, with a maximum weight variance of +/- 10 grams, all bumper plates have an exact outer circumference of 450mm that corresponds with international standards. The centre hole diameter of 50.4mm is in correspondence with IWF requirements and ensures a nice fit without movement. Due to the exact size of the hole, it is recommended that the bumpers only be used with high quality barbells that have been machined to a maximum collar diameter of 50mm, as is IWF standard. We recommend that you measure your Olympic bar collars if you already have bars with digital callipers in order to ensure that your Olympic bar is suitable. We will not refund bumper plates due to any Barbell fault.

Bumper plates are warranted for indoor use and must be used on protective, impact-absorbing surfaces, such as an Olympic lifting platform or Rubber Gym tiles at a minimum thickness of 15mm. They are not warranted for use on rigid, uneven surfaces such as concrete, gravel etc. as this will void warranty. Misuse will not be warranted.

## Strength Training Equipment Limited Warranty

Description	Warranty
Structural Steel Framework	Lifetime
Rotary Bearings, Weight Stacks, Pulleys, Guide Rods, Structural Moving Parts	2 years
Cable, Linear Bearings, Springs	1 year
Upholstery, Handgrips, All Other Items Not Listed	6 Months

## Cardiovascular Equipment Limited Warranty

Description	Warranty
Frame	7 years
Display PCB	2 years
Key pad	1 year
Motor Controller	2 years
Durable Wear Parts	1 year
Treadmill AC motor	3 years
Treadmill DC motor	1 year
Generator /EMS/ECB brake	2 years

## Functional Training Equipment Limited Warranty
