

Save On Energy Retrofit Program

The Council of The Corporation of the Municipality of Bayham was presented with a cheque in the amount of \$16,134.00 from Ontario Clean Water Agency at the Regular Council meeting held February 21, 2019.

The funds were received as part of the Save On Energy Retrofit Program following the Energy Conservation improvements at the Wastewater Treatment Plant. The improvements met the criteria to provide sustainable, measurable and verifiable reductions in peak electricity demand and electricity consumption.

The Municipality will continue to seek options to reduce costs and Save On Energy.
