11.81" (30 cm)

Assembly 3

W
10.24"
(26 cm)

Adjustable modular suspension LED system that allows for multiple arrangements. A single Kup Module consists of a T-shaped tubular structure with two cups that can be placed at two of the three ends of the T-shaped structure. See assembly examples below. An infinite number of Kup suspended fixtures is possible by connecting Kup Modules to each other in different ways.
