Lift Adjustable Coffee & Side Table

The height-adjustable design moves up and down with ease so that you can use it in composition with dining chairs as well as high counter and bar stools. With a knob on the base, it locks the table with its adjusted height in place for convenience. The raised edge around the round top keeps items secure and adds a multi-dimensional feature. The top comes in black glass, while the frame is in aged brass to create a stunning finished product.
